

COUNTY GOVERNMENT OF KITUI

ANNUAL DEVELOPMENT PLAN

FY: 2018/2019

County Mission and Vision

County Vision

To be an empowered and prosperous County with a high quality of life

County Mission

To provide transformative county services through effective utilization of our land, capital, labour, technology and leadership for sustainable socio-economic development

Foreword

The Public Finance Management Act (PFMA), 2012 Section 126 sub-section (1) requires county governments to prepare an Annual Development Plan (ADP) in accordance with Article 220 (2) of the constitution. The ADP lays the foundation and sets the tone for priority projects and programmes to address the development challenges that face the county. This ADP provides information on the county (location, size, physiographic and natural conditions, demographic profiles, administrative units, legal framework and linkage to County Integrated Development Plan (CIDP)), progress of implementing the previous ADP, strategic priorities, programmes and projects, resource allocation, Monitoring and Evaluation and key recommendations.

The County Government is responsible for delivery of services such as health care, water and sanitation, agriculture, trade development and regulation, planning, pre-primary education and village polytechnics among others as detailed in Part II of the fourth schedule in the Constitution of Kenya, 2010. This document is aligned to the Kitui CIDP (2018- 2022) and the national development framework as envisioned in Vision 2030 and Sustainable Development Goals (SDGs).

The development of the ADP included a comprehensive consultation with all the county ministries and agencies who draw funds from the county revenue fund where their inputs were gathered and incorporated in the document. The County Government of Kitui will roll out developmental projects that will create an environment for its residents to enjoy a high quality of life, a lasting positive experience for the visitors and a conducive environment for investors to do business.

Acknowledgement

The preparation of this Annual Development Plan was a vigorous process which involved all the county spending entities and started in the last financial year during the budget implementation process. The County Treasury played a coordinating role in the preparation process. I want to extend my gratitude to all Chief Officers for leading their staff in providing information towards preparation of this document.

I would like to specifically thank the officers working under Economic Planning department under the leadership of Deputy Director, Fidhelis Mwaniki, Principal Statistician, Victor Mwangi and the entire team of county economists Paul Kimwele, Daniel Mbathi, Bonface Muli, Faith Munah, Hanrieta Ndunge, Charles Mulatia, Nicholas Koome and Geoffrey Gisaina who helped put this document together. I also thank Dr. Temi Mutia for his inputs especially in aligning the ADP with the Governor's manifesto. The team put tireless quality time in production of this document.

I am sure the people of Kitui County will join me in thanking them for their efforts as we move forward to realizing our common objectives in achieving our vision.

Mr. Justus Kalii

Executive Summary

The Annual Development Plan (ADP) 2018-19 is the fifth development plan for the county under the devolved governance structure. The plan is prepared by making reference to the County Integrated Development Plan (CIDP) and the Kitui County Profile. In order to ensure efficiency in resource allocation, maximize benefits to the citizens and minimize the number of uncompleted projects, emphasis has been laid on implementation of the CIDP 2018-22 and departments advised to allocate funds to ongoing projects which do not have adequate allocation.

This Annual Development Plan is organized in six chapters as follows:

Chapter One:

Highlights in brief, the general county information which provides description of the County in terms of the location, size, physiographic and natural conditions, demographic profiles as well as the administrative and political units. It also explains the objective of the Annual Development Plan, legal framework and its linkage to CIDP. It further details the methodology used in preparing the plan.

Chapter Two:

This chapter provides a summary of what was planned in the previous year and what was achieved by the sectors. The section also indicates the overall budget in the previous ADP versus the actual allocation. It finally outlines the challenges encountered during the implementation of 2016/17 projects.

Chapter Three:

Presents brief information of the county ministries, vision and mission statements and core functions of each ministry. It provides in brief the broad ministry development strategic priorities for the 2017/19 budget, the stakeholders' roles and the details of the projects and programmes to be implemented. Looks at the assumptions implied while preparing the ADP, the risks that may result in the non-implementation of the plan as proposed and how to mitigate the risks. Finally the chapter provides stakeholder analysis and expectations.

Chapter Four:

Presents a summary of the proposed budget by spending entity. It also provides a description of how the county government is responding to changes in the financial economic environment. The chapter states the risks, assumptions and mitigation measures during the implementation period.

Chapter Five: This Chapter describes Monitoring and Evaluation structure in the County. It further details the process involved including data collection, collation and analysis and reporting. This chapter helps in tracking implementation of programmes and projects.

Chapter Six: The Chapter presents conclusion and recommendations done on the previous. It captures pertinent aspects like enhancement of revenue, improved public participation, fiscal discipline and implementation of plans.

CHAPTER ONE
INTRODUCTION AND OVERVIEW OF THE COUNTY

1.1 Introduction

This chapter provides the background on the preparation of the Annual Development Plan including the legal basis. It describes in brief the general county information which provides description of the County in terms of the location, size, physiographic and natural conditions, demographic profiles, administrative and political units, the objective of the ADP, the county priorities and development Challenges.

1.2 Annual Development Plan Legal Frame Work

The Annual Development Plan is prepared in accordance with section 126 of the Public Finance Management Act, 2012 which states that:

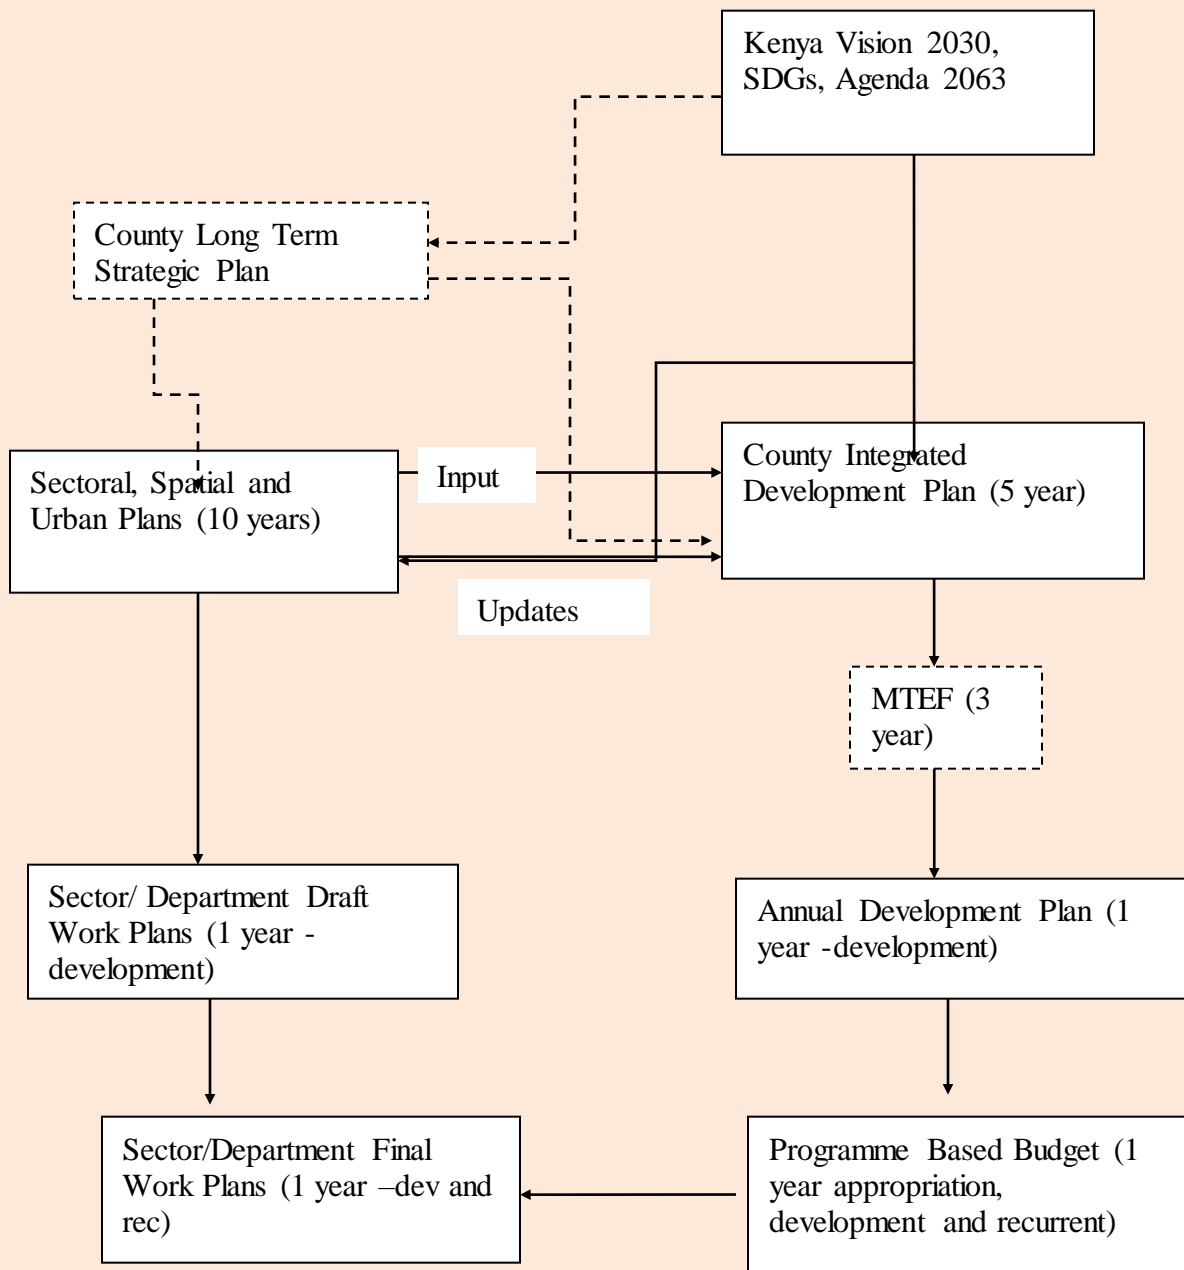

- (1) Every county government shall prepare a development plan in accordance with Article 220 (2) of the Constitution, that includes:
 - (a) strategic priorities for the medium term that reflect the county government's priorities and plans;
 - (b) a description of how the county government is responding to changes in the financial and economic environment;
 - (c) programmes to be delivered with details for each programme of:-

 - i The strategic priorities to which the programme will contribute;
 - ii The services or goods to be provided;
 - iii Measurable indicators of performance where feasible; and
 - iv The budget allocated to the programme;
 - (d) payments to be made on behalf of the county government, including details of any grants, benefits and subsidies that are to be paid;
 - (e) a description of significant capital developments;
 - (f) a detailed description of proposals with respect to the development of physical, intellectual, human and other resources of the county, including measurable indicators where those are feasible;
 - (g) a summary budget in the format required by regulations; and
 - (h) Such other matters as may be required by the Constitution or this Act.
- (2) The County Executive Committee Member responsible for planning shall prepare the development plan in accordance with the format prescribed by regulations.
- (3) The County Executive Committee Member responsible for planning shall, not later than 1st September each year, submit the development plan to the county assembly for its approval, and send a copy to the Commission of Revenue Allocation and the National Treasury.

- (4) The County Executive Committee Member responsible for planning shall publish and publicize the annual development plan within seven days after its submission to the county assembly.

1.3 Overview of the County

Kitui County is one of the 47 counties in the country located about 160km East of Nairobi City. It is the 6th largest county in the country, covering an area of 30,496.4 km² including 6,369 km² occupied by Tsavo East National Park. The County shares its borders with seven other counties: Machakos and Makueni Counties to the West, Tana River County to the East and South-East, Taita Taveta County to the South, Embu to the North-West, and Tharaka-Nithi and Meru Counties to the North. It is located between latitudes 0°10' and 3°0' South and longitudes 37°50' and 39°0' East.

The climate of the Kitui County is hot and dry with unreliable rainfall. The climate falls under two climatic zones i.e. arid and semi-arid with most of the County being classified as arid. The County experiences high temperatures throughout the year, ranging from 14°C to 34°C. The hot months are between September and October to January and February. The maximum mean annual temperature ranges between 26°C and 34°C whereas the minimum mean annual temperature ranges between 14°C and 22°C. July is the coldest month with temperatures falling to a low of 14°C while the month of September is normally the hottest with temperature rising to a high of 34°C. Due to the high temperatures experienced in the county throughout the year the rate of evaporation is high with a mean annual potential evaporation in the central and north-western regions of the county ranging between 1800 to 2000mm while in eastern and north-eastern regions, the range is from 2200 to 2400mm. The bulk of the County falls within 1800 to 2200mm range. The rainfall pattern is bi-modal with two rainy seasons annually. The long rains fall in the months of March to May. These are usually very erratic and unreliable. The short rains which form the second rainy season fall between October and December and are more reliable. The rest of the year is dry and the annual rainfall ranges between 250mm-1050 mm per annum with 40% reliability for the long rains and 66% reliability for the short rains. Rainfall is highly unpredictable from year to year.

The County of Kitui is endowed with various natural resources such as forests, permanent and seasonal rivers, hills, rocks, wildlife among others. Apart from the natural resources, the county can also be divided into nine Agro Ecological Zones which include: UM3, which is very small (in pockets), and Semi-arid farming zones which include; UM3-4 the transitional marginal coffee zone around Migwani and Kitui Central. The UM4 is considered as the sunflower- maize zone or Pigeon peas-maize zone. LM3 is the cotton zone, is very small and many are steep slopes mainly for forest reserves, while LM4 is marginal cotton zone. LM5 is the livestock-millet zone which is suitable for livestock and millet production, while LM6 and IL6 are the ranching zones; here no rain-fed agriculture is suitable except with runoff-catching techniques. IL5 is suitable for both livestock and millet production. These semi-arid zones have good potential for agricultural development and are currently either cultivated or lying fallow under woodland. Due to population pressure the less fertile semi-arid ranching areas are currently used for food crops production and livestock keeping which leads to

frequent crop failures as these areas are not suitable for growing of certain crops under rain-fed agriculture.

The County's population was 1,012,709 according to the population and housing census report of 2009. The report showed that 531,427 were females while 481,282 were males and this was expected to grow to 1,223,394 by 2018. The population growth rate of the county at 2.1% is slightly lower than the national rate of 2.6%. Kitui County is divided into 8 sub-counties namely; Kitui Central, Kitui West, Kitui East, Kitui South, Kitui Rural, Mwingi North, Mwingi Central and Mwingi West. It also has forty (40) wards and Two Hundred and FortySeven (247) villages. The sub-counties are administrated by the Subcounty Administrators, wards by Ward Administrators and County Villages by Village Administrators.

1.4 Annual Development Plan Linkage with the CIDP

The county priorities for the FY: 2018 / 2019 will include:

- a. **Access to clean water and sanitation:** To increase accessibility of water by reducing the distance from 15km to 12km and increasing kilometres of pipeline.
- b. **Boost Agriculture:** To transform rainfall to irrigated agriculture hence increase food productivity and ensure food security.
- c. **Access to quality and affordable healthcare:** Increase accessibility to health centres and dispensaries by reducing proximity to health care facilities leading to reduced mortality rate.
- d. **Quality Education:** Easy access to affordable and quality education.
- e. **Improved Infrastructure:** Efficient and effective transport and communication network leading to improved trade and easy movement within the county
- f. **Clean and conducive environment:** Ensuring a clean and conducive environment through increased forest cover and clean towns.

1.5 Objectives of Annual Development Plan (ADP)

- a. To communicate the county government's broad strategies during the plan period.
- b. To act as a guide in the implementation of development projects and programs for the county ministries.
- c. To ensure prioritization of projects and programs by departments.
- d. To provide linkage between policy, planning and resource allocation.

1.6 Development Challenges

The ADP seeks to address the myriad development challenges of the county that include: food insecurity; water scarcity; poor and inadequate preventive and curative health care, environmental degradation, adverse climate variability and change, poor academic performance and low quality of education; inadequate technical skill, low access and adoption of modern information and communication technologies, underdeveloped ICT infrastructure, unsustainable extraction and utilization of natural resources, untapped tourism

potential, inadequate frameworks for nurturing talents, skills and innovation; poor savings and investment culture; weak commercial and industrial base, inequitable development; uninformed public; unplanned urban areas; weak socio-economic linkages between rural and urban areas; inadequate electricity access and connectivity, inadequate awareness, appreciation and adoption of agricultural technologies, poor roads and transport infrastructure; inadequate institutional stakeholder mapping and coordination; youth unemployment, marginalization of women and people living with disabilities; low income, low access to financial credit; among others.

2.3 Challenges Faced During the Implementation of the Previous ADP (i.e. 2016/17 ADP)

- i. **Untimely release of funds:** Funds from the exchequer were not released timely as anticipated. This hindered timely implementation of planned activities.
- ii. **Procurement process:** Lengthy procurement processes and low financial and technical capacity on the part of contractors to complete projects within specified contract periods.
- iii. **Acquisition of land:** This has been faced with two challenges; National Government not ready to accommodate the County Government in the existing Public lands and the citizens (land owners/landlords) selling their land at very high prices thus being exploitive to the County Government.
- iv. **Staffing:** Inadequate technical staff to provide effective technical and supervisory services for public service delivery.
- v. **Transport network/Logistics:** Inadequate transport and logistical facilities for project implementation, supervision, monitoring, evaluation and reporting. Poor road network inhibiting access to some of the project sites which led to delays and sometimes extra costs
- vi. **Monitoring, Evaluation and Reporting:** Inadequate project supervision by the technical departments leading to delay in projects completion and sometimes compromised/low-quality works.
- vii. **Access to Financial Resources:** Inadequate financial resources to match increased demand for projects by the public. There is also lack of an operating loan scheme to finance traders including contractors/merchants.
- viii. **Inadequate Local Revenue Mobilization Framework:** Part of resource envelop for the county is locally collected revenue from different streams. Certain frameworks were lacking during 2016/17 financial year, these include, and not limited to, revenue enhancement plan, revenue automation, revenue administration bill and establishment of County Liquor Boards.
- ix. **Poor Network Connectivity:** With the introduction of internet banking and the requirement that all financial transaction/payments should be done through IFMIS/IB, there is a need for stable network connectivity.

- x. **Political Issues:** A legal battle with civil societies and the prolonged election period in 2017 hindered implementation of planned projects and programmes.

2.4 Lessons Learnt and Recommendations

- a. The Medium Term Expenditure Framework (MTEF) budgeting process ensures effective planning at the county and therefore all ministries should embrace MTEF budgeting approach
- b. The county ministries should ensure that projects and programmes in ADP, CFSP and annual estimates are linked to CIDP
 - a. The county ministries should come up with enhanced revenue collection strategies to ensure there is no budget deficit.
 - b. County ministries which have comprehensive annual work plans with realistic procurement plan, cash flow projection will ensure timely project implementation.
 - c. Monitoring and Evaluation (M&E) provides information to help in decision making and track progress of project and programme implementa
 - d. The county Government should therefore design and implement a comprehensive monitoring and evaluation system that will help in managing for impact.

3.1.13 Kitui Town Administration

Urbanization postulates a key concern in the Kenya's development blue-print, vision 2030, and as such has become a National and County Government's priority. The creation of well planned,

vibrant and efficient urban centers is anchored on the Urban Areas and Cities Act (UACA), The National Urban Development Policy (NUDP) Draft, The County Governments Act, as well as The Constitution of Kenya 2010. Kitui town which is the Kitui County headquarters is about 580 Square Kilometers, with the township covering 195 Square Kilometers (The Kenya Bureau of Statistics (KBS) census of 2009). The population of the town is about **155,806** residents. Kitui Town Administration is composed of five departments namely:

- Finance and Economic Planning.
- Trade, Commerce and Industrialization.
- Physical Planning, Infrastructure, Transport and Development Control.
- Administration and Corporate Services.
- Environment, Culture, Recreation and Community Development.

3.1.14 Mwingi Town Administration

Mwingi Town is one of the two legally recognized in Kitui County. The Local Government Act Cap 265 of the Laws of Kenya gave the Minister jurisdiction over the area within 16 km radius. The Kenya Bureau of Statistics census of 2009 put the Town's urban population at 15,970 with a projected national average annual population growth rate of 2.7%. The importance of Mwingi Town derives from its significance as a revenue base and being the commercial centre for the northern part of the County. The justification for this is that *Mwingi town is [a] trade and commercial hub area of the County; given its location on the Nairobi – Garissa highway, proximity to Mui basin and the proposed LAPSET transport corridor. The County Government will improve the social amenities and infrastructure of the town*

Mwingi Town Administration is made up of the following 5 Departments;

- Finance and Economic Planning;
- Trade, Commerce, and Industrialization;
- Physical Planning, Infrastructure, and Development Control;
- Administration and Corporate Services;
- Environment, Culture, Recreation, and Community Development.

Figure 2: proportion of the proposed budget for the spending entities to the total budget

4.2 Financial and Economic Environment

According to the County Governments Act, the different revenue sources available to the County governments are categorized into the following sources;

- **Transfers from the National government:** Part 4 of the constitution provides an elaborate rationale and mechanism for sharing and transfer of revenue collected by the National Government to the 47 counties. The constitution also provides that counties must get at least 15% of the total revenue. They should use at least 30% of all revenues on development activities.
- **Funds collected from the County’s local sources:** The County local taxes are as per the table below:

1. Local Taxes	2. Fees
Property Taxes	Advertising billboards, murals
Single Business Permit.	Fines & penalties
Cess	Land based transactions
Royalties	Burial and cemetery

	National park fees Various permits and approvals Entertainment
3. User Charges	4. Borrowing
Parking fees Fire services House rents Hire of facilities or equipment	<input type="checkbox"/> Bank loans & overdrafts <input type="checkbox"/> External loans <input type="checkbox"/> Private Public Partnership Initiative <input type="checkbox"/> Issue of bonds or stocks
5. Income from Investments	
Interest and dividend from investments Sale of shares and stocks Sale of bonded assets and inventory	

- **Grants:** Section 47 of the Public Finance Management act stipulates that a County can receive grants from the National government, its agencies and third parties. The County will undertake a comprehensive assessment of grants and analyze how best to tap into the opportunities.
- **Loans from local institutions and Bank overdrafts:** The Public Finance Act allows County governments to obtain loans and issue securities for purposes of development. The Act is very elaborate on the way the loans should be managed.

4.3 Risks, Assumptions and Mitigation measures

<i>Risks</i>	<i>Assumption</i>	<i>Mitigation measures</i>
Unexpected shocks in the economy that may constrain the National Treasury's ability to disburse funds as scheduled. Such shocks have in the past led to funds being directed to unplanned activities both at the county and the national level.	That the National Treasury will ensure timely disbursement of the equitable share funds. That there will be a conducive political environment both at national and county level. That the Macroeconomic variables will not change adversely.	To prevent delays in project Implementation, County ministries must develop a comprehensive annual work plan that will include an elaborate procurement plan and cash flow projection and strictly adhere to it as it will ensure timely project implementation..
Delay in obtaining the necessary approvals has had negative effects in the past. Bills, policies and implementation guidelines that take longer to pass result in lost revenues and postponed implementation of programs and projects.	That the County Government will achieve the set revenue targets.	The county ministries should come up with enhanced revenue collection strategies to ensure there is no budget deficit.

<i>Risks</i>	<i>Assumption</i>	<i>Mitigation measures</i>
Constrained absorption of development funds necessitating supplementary budgets and consequently shifting priorities.	That the sectoral priorities will not change over the planned period.	The county ministries will embrace MTEF framework in their budgeting as this will ensure departments have a clear planning framework in the medium term. It is also necessary to ensure that the project and program in the ADP, CFSP and Annual Estimates are linked to projects and programs in the CIDP.

CHAPTER FIVE MONITORING AND EVALUATION

5.0 Introduction

This chapter discusses the County Monitoring and Evaluation framework as outlined in the County Integrated Development System (CIMES). The CIMES involves monitoring and evaluation of all the data for each indicator for all the projects and programmes against pre-set targets and objectives. To effectively create a CIMES, each project, programme should have a results log frame (results chain) that clearly shows the inputs required, the activities to be undertaken, the outputs or to be achieved and the outcomes of benefits that will accrue to the community. Indicators to track progress should also be developed for all the elements of the results chain. To effectively monitor county performance, each project, programmes or policy implemented under each component of the CPMF should also develop a performance matrix that must identify; the outcomes to be achieved, the indicators to measure the outcomes, a baseline status of the outcome indicator and the target or expected change to be achieved. The expected change based on the current status of performance and the set targets enable departments to estimate the amount of time and resources required to achieve the desired change.

The M&E reports are used in two ways: First, to make management decisions such as resource allocations or change of strategy (managing for results) and second, to inform the citizens on the progress the county government has made or otherwise (managing for accountability). The M&E report presents results on each element of the results chain (inputs, activities, outputs and outcomes. These way citizens are able to hold the county government to account. To ensure an effective M&E system, the county intends to put in place key components. These include an M&E unit, adequate human resource capacity, indicator handbook, appropriate policy framework and an M&E plan for the county.

5.1 Data Collection, Analysis and Reporting Mechanism

Preparation of the Annual Development Plan involves design and submission to ministries/departments of the guidelines to be followed when crafting the plan; receiving submissions from the ministries, desk review, and consolidation of the submission by the economic planning department. The consolidated submissions are subjected to cabinet for review and onward submission to county assembly for approval.

The ADP is prepared by compiling county ministries' broad strategic priorities and objectives and their annual implementation plan for the FY 2018/2019. The work entails performing desk-based research and actual writing of the ADP.

The Annual Development Plan is compiled by the department of Economic Planning in the County Ministry of Finance and Economic Planning.

CHAPTER SIX

CONCLUSION AND RECOMMENDATIONS

6.0 Introduction

This chapter identifies key policy thrusts that must be observed in the execution of this plan for sustainable outcomes to be achieved and measured. These include: Revenue enhancement, Public participation, Participatory Monitoring & Evaluation, Incentives for Investment, Enhanced Fiscal Discipline and Coordination of Development.

6.1 Revenue enhancement

The County will therefore improve revenue collection mechanisms and systems to ensure the achievement of collection targets. During this financial year the County will undertake measures aimed at expanding the revenue base and increasing tax compliance through integration of technology in revenue collection. The County will seal leakages to ensure that the gains met by better targeting and collection practices are not reversed.

6.2 Enhanced public participation

The Constitution of Kenya 2010 makes citizen participation a central part of Kenya's governance system. Participation of the people is recognized in Article 10 of the Constitution of Kenya as one of our national values and principles of governance. Further Article 174(c) provides that the object of devolution is to: "Enhance the participation of people in the exercise of the powers of the State and in making decisions affecting them." The County will seek to entrench effective public participation in policy formulation, planning, budgeting, implementation, monitoring and indeed all spheres of governance. This is expected to yield better outcomes in enhancing Transparency and Accountability. All sectors are expected to comply with this key policy thrust by identifying relevant stakeholders and ensuring that a framework for public participation is developed and executed.

6.3 Fiscal discipline

Strong financial management systems are essential for improved service delivery. Effective financial management systems in the County will maximize financial efficiency, improve transparency and accountability, and in theory will contribute to long-term economic success. The government will follow the principles of public finance in financial management as outlined in Article 226 of the constitution of Kenya and PFM Act 2012. All expenditure to be incurred by the government will be within the approved budget.

6.4 Coordinated implementation of plans

A closer linkage between Planning, budgeting, Implementation and reporting is imperative in tracking how development and policy interventions translate into social goods and services for public consumption. The County will therefore seek to entrench timely reporting of both budget and

program implementation from a well-coordinated planning unit. Quarterly and annual Monitoring & evaluation reports are expected to provide timely updates on implementation for management to make appropriate interventions for effective and efficient delivery of planned outcomes.

6.5 Incentives for investment

Investment promotion in the County is considered as a major economic enabler. Quality investment is expected to unlock the County’s potential for economic growth and prosperity. In this regard, sectors are expected to identify opportunities for boosting investments and spice up the environment with bankable incentives for exploiting such investments. Priority should be given to investments that hold greater potential for employment creation and poverty alleviation.
