CHAPTER ONE

1.0 PREFACE.

Mr. Speaker sir,

It is my honour and privilege to present to this House, the report by the Committee on Trade, Industry, ICT and Cooperatives on the inspection exercise on Market sheds and livestock yard projects funded by County government carried out from 1st -5th July 2025

1. 2 Composition of the Committee

Hon. Speaker,

The Committee on Trade, Industry, ICT and Cooperatives was established pursuant to Kitui County Assembly Standing Order No. 190. The committee comprises of the following Members:

1. Hon. Daniel Ngoima Kimanzi	Chairperson
2. Hon. Nzavu Mwanzia	V/Chairperson
3. Hon. Boniface Maundu Katumbi	Member
4. Hon. Elizabeth Ndunge Peter	„
5. Hon. Munyoki Mwinzi	„
6. Hon. Joseph Musyoka Mbite	„
7. Hon. Jacqueline Cate Kalenga	„
8. Hon. Daniel Kimanzi Muange	„
9. Hon. Kalamba Musau	„
10. Hon. Aron Kasele Kilonzi	„
11. Hon. David M. Masaku	„

1.3 The Committee's Mandate

Mr. Speaker, The Committee on Trade, Industry, ICT, and Cooperatives derives her mandates from the provisions of Standing Order No. 190(5), which define the functions of the Committee as follows;

- a) Investigate, inquire into, and report on all matters relating to the mandate, management, activities, administration, operation and estimates of the assigned department;*
- b) Study programs and policy objectives of departments and the effectiveness of the implementation;*
- c) Study and review all county legislation referred to it;*
- d) Study, assess and analyse the relative success of departments as measured by the results obtained as compared with their stated objectives;*
- e) Investigate and inquire into all matters relating to the assigned departments as they may deem necessary, and as may be referred to them by the County Assembly;*
- f) To vet and report on all appointments where the constitution or any law requires the County Assembly to approve, except those under Standing Order 185 (Committee Appointments); and*
- g) Make reports and recommendations to the county assembly as often as possible, including recommendation of proposed legislation.*

1.4 ACKNOWLEDGEMENT

Mr. Speaker Sir,

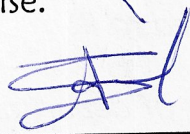

The completion of this exercise was made possible by the selfless commitment of numerous individuals who contributed expertise and diverse human resources to see this assignment come to success.

Mr. Speaker Sir,

I express reflective gratitude to the Offices of the Speaker and that of the Clerk of Assembly for the facilitation accorded to all members in the fulfillment of their oversight mandate. Further, I thank the members of the County Assembly for their commitment and dedication to the cause.

Finally, Mr. Speaker Sir, I extend our gratitude to the secretariat for their technical support in the entire exercise. It is through their enthusiasm, tireless hard work, and commitment that we credit the accomplishment of this very important exercise.

Signed: _____

Date: _____

29/08/2025

HON. DANIEL NGOIMA KIMANZI
CHAIRPERSON, COMMITTEE ON TRADE, INDUSTRY, ICT &
COOPERATIVES

The Report was compiled by:

Patrick Kyalo Mutua -Second Clerk Assistant

Benedict Mutuku -Hansard Officer

CHAPTER TWO

2.0 BACKGROUND

Mr. Speaker Sir,

The Constitution of Kenya, 2010, envisions decent principles in public resource mobilization, planning, and management. Article 224 of the Constitution provides that every County Government shall prepare and adopt its own Annual Budget and an Appropriation Bill in the form and according to the procedure prescribed in an Act of Parliament.

The County Assembly has passed Budget Estimates in every financial year since its inception for implementation by the County Executive. Every County Ministry has implemented various projects in every Financial Year.

Mr. Speaker Sir,

Members of the County Assembly have periodically raised concerns on the floor of the House regarding the status of development projects within their respective Wards. They have highlighted recurring issues such as substandard workmanship and prolonged delays in project execution.

The members resolved to collectively appraise the utilization and implementation of budgets by different County Ministries through undertaking a project inspection exercise across the County on sampled projects, in order to collect first-hand information relating to the complaints, and thereafter prepare a comprehensive report on their findings.

In undertaking the inspection exercise, the Assembly acted within the provisions of **Article 185 (3)** of the Constitution, which states that; -

“A County Assembly, while respecting the principle of the separation of powers, may exercise oversight over the County Executive Committee and any other County Executive organs;

In line with their commitment to effective oversight, Members of the County Assembly were grouped into four teams to conduct project inspections across all eight sub-counties, carried out from 1st and 5th July 2025

Mr. Speaker, the Committee undertook inspection on the following projects:

i. KWAMULUNGU MARKET SHED.

Mr. Speaker Sir,

On 1st July 2025, the Committee visited the Kwa-Mulungu Market Shed, where they were received by the Village Administrator, and members of the public.

The committee was informed that the Ministry has undertaken the construction of a market shed in the area. This development is expected to significantly enhance local trade and provide shelter for *mama bonga* (informal traders), contributing to the economic empowerment of the community.

During the engagement, the community expressed appreciation for the ongoing development efforts. However, they also highlighted several challenges and necessary installations to ensure the market's full functionality and safety. Key concerns included the absence of toilets, non-functional solar lights both within the market and along the pathway to the primary school, and the lack of water tanks despite gutters already having been installed. Additionally, there were safety concerns regarding the market structure, particularly due to the absence of protective side grills.

Committee's recommendations

1. Construction of a Market Toilet to improve sanitation and hygiene for traders and market users. **Include accessible design features** (e.g., handrails, ramps) for people with disabilities and the elderly.

2. Installation of Solar Lighting-repair and maintain existing non-functional solar lights to enhance security and usability during early morning and evening hours, and extend solar lighting to the nearby school.

3. Water Storage Facilities

Install two 10,000-litre water tanks at strategic points to serve both the market and the nearby school.

Link tanks to rainwater harvesting systems to supplement the supply sustainably.

Provide lockable taps and elevated stands to prevent misuse and ease access.

4. Installation of Protective side grills

- ✓ Erect safety rails along the sides of the market shed to prevent accidents and enhance the safety of traders and customers.

ii. KITHUMULA MARKET SHED

Mr. Speaker Sir,

The committee visited the Kithumula market shed to engage with local traders and assess the state of market infrastructure. The Committee was briefed by the community on several pressing challenges affecting their operations.

Key Issues Raised by the Community include:

- **Solar Lighting:** The market is equipped with approximately twelve solar lights. However, only five are currently operational, leaving large sections of the market in darkness during evening hours.
- **Sanitation Facilities:** The market lacks basic sanitation infrastructure, including an ablution block. This poses significant health and hygiene concerns for both traders and customers.
- **Cleanliness and Maintenance:** There are no designated market cleaners, leading to poor waste management within the market.

Committee's specific recommendations

The committee, having scrutinised the submissions of the community, makes the following recommendations:

That the County Ministry of TIMIC should:-

- i. Ensure the repair of the seven non-functional solar lights are done to restore adequate lighting.
- ii. Install additional solar lights to enhance security and extend trading hours.
- iii. Prioritize the construction of market toilets and the deployment of cleaning personnel to maintain hygiene standards.

iii. MUTONGUNI MARKET.

Mr. Speaker Sir,

The committee visited Mutonguni Ward to inspect the current state of market infrastructure and engage with the local community on pressing issues affecting traders and residents. The visit aimed to assess the impact of recent developments and gather public input for policy and planning.

Traders in the market made the following submissions to the Committee:

- i. The construction of the Kibwezi–Kitui–Migwani Highway led to the partial demolition of the Mutonguni market; the entire market was displaced, severely affecting local traders who now lack a designated space to conduct business.
- ii. The bus park is currently the only available open space, and the public has requested that it be temporarily designated as a trading area.
 - Two elevated water tanks (each with a capacity of 5,000 litres) were installed in the market several years ago; these tanks remain non-operational, depriving traders and the public of a critical water source.
 - The remaining part of the market lacks adequate lighting and requests the installation of three additional solar-powered lights to improve security and extend trading hours.

- The market lacks trees within the market area for shade and environmental enhancement.

Land Ownership and Encroachment Issues

- According to a 1962 land survey map, the market was originally allocated 4.4 hectares.
- A significant portion of this land is reportedly under threat from land grabbers.

The community requested urgent action to:

- Authenticate the market land title through the County and National Land Registries.
- Protect the land from illegal acquisition and ensure it remains public property.

Proposed National Government Market Project

- The committee was informed that the National Government has pledged Ksh 50 million for the construction of a new modern market in Mutonguni. However, there is currently no designated or prepared land for this project owing to said land grabbing.
- The public emphasized the need to secure and allocate land for the proposed market. Ensure transparency and community involvement in the planning and implementation process.

Committee's specific recommendations

The committee, having scrutinised the submissions of the public, makes the following recommendations:

That the County Ministry of TIMIC should undertake the following measures in the underlisted areas:-

1. Market Infrastructure

- Designate the bus park as a temporary market space to support displaced traders.

- Repair and activate existing water tanks to provide access to clean water.
- Install 3 solar lights to enhance safety and enable longer trading hours.
- Plant trees within the market for shade and environmental improvement.

2. Land Ownership and Encroachment

- Authenticate and register land title through the County and National Land offices.
- Ensure proper measures to prevent illegal land acquisition and preserve public land.
- Unsettled land ownership and encroachment threats on the original 4.4-hectare market parcel jeopardize any future redevelopment; formalizing the title, protecting it from grabbers, and involving the community in site allocation are essential to ensure the pledged Ksh 50 million for a new market is effectively utilized.

IV. KANZI KO STOCK YARD IN KANZI KO/SIMISI WARD

Mr. Speaker Sir,

The committee, was accompanied by the Ward Administrator, the area Assistant County Commissioner's, the Area Chief and other local leaders inspected the proposed land designated for the establishment of a livestock development project.

The Ward Administrator informed the Committee that the parcel in question measures approximately 1.3 acres and is owned by the County Government of Kitui, having been acquired in 2012 by the defunct Kitui County Council. The property is registered under title number 244/6/2025 within the Mutomo/Kyatunda area, as per map sheet no. 27.

The Ward Administrator further informed the Committee that beacons had previously been put in place to demarcate the land. However, members of the seller's family contested the legitimacy of the sale following the demise of

the original seller. They alleged that no formal transaction had taken place and expressed strong objections to any surveying or development activities without their involvement.

In light of this dispute, the community appealed to the committee to expedite a peaceful resolution of the matter to enable the commencement of project preparations, including fencing and beacon reinstatement. Concerns were raised regarding potential delays and the risk of escalating tensions if the issue remains unresolved.

Committee's recommendations

The County Ministry of Trade, Industry, MSMEs, Innovation and Cooperatives should:-

1. **Conduct a Title Search and Legal Review:** Engage the Land Registrar to verify the property's ownership, historical transactions, and any documentation from the 2012 acquisition. Engage the Land Registrar for clarity.
2. **Consult the County Legal Office:** Get an official legal opinion from the County Government to confirm their claim and determine next steps regarding any encumbrances.
3. **Hold a Mediated Stakeholder Dialogue:** Convene meetings with representatives of the seller's family, local leaders, and government officials to hear all claims and attempt a peaceful resolution.

V. MUTHA LIVESTOCK YARD

Mr. Speaker Sir,

The committee visited the Mutha livestock yard on Wednesday, 2nd July 2025, which coincided with the market day. The yard was bustling with activity, filled with traders and livestock, including cows, goats, and sheep, sourced both locally and from neighbouring Tana River County.

The Committee was briefed by the the revenue officers manning the livestock yard that the facility is situated on privately owned land currently leased to

the county government. Members observed that the yard lacks proper fencing, with multiple openings that hinder effective revenue collection by the county revenue officers.

Traders urged the committee to expedite the formal acquisition of the livestock yard to enhance revenue collection, facilitate better management of livestock, particularly bulls, and improve overall infrastructure. They emphasized that permanent construction would bring additional benefits such as washrooms and water reservoirs, which are essential for both hygiene and operational efficiency.

Committee's Specific Recommendations

The ministry should initiate formal land acquisition of the livestock yard from the private owner to secure long-term controls and investment viability, including erecting a perimeter wall, building washrooms, water reservoirs, and livestock holding pens to improve hygiene and efficiency.

• VI. ENDAU LIVESTOCK YARD & MARKET SHED

Mr. Speaker Sir,

Committee Visit to Livestock Yard and Market Shed, Thursday, 3rd July 2025, which coincided with the market day, a committee visited the livestock yard and market shed in Endau. The area was bustling with activity, drawing traders from Zombe, Mwitika, Mutito, and Malalani. The committee was accompanied by the Ward Assistant Officer during the visit to the livestock yard.

a) Livestock Yard

The committee made the following observations:

- i. The yard is spacious, but the perimeter fencing is significantly damaged.
- ii. Numerous concrete posts have fallen making the fence porous.
- iii. Repairs and reinforcement are urgently needed in several sections to restore functionality and safety.

b) Market Shed

Key findings regarding the market shed include:

- i. The committee observes that the twin market sheds were constructed during the 2015/2016 financial year and currently accommodate local traders.
- ii. In the same vicinity, an additional market structure built by the defunct Kitui Council was noted for its good design but found it to be non-functional. Members were informed that the roof was destroyed by strong winds while the walls had started developing cracks.
- iii. The market shed area is being misused as a dumping site for waste, which undermines its intended purpose and hygiene standards.
- iv. A four-door ablution block, also constructed in the 2015/2016 financial year, was reported to be full and in need of expansion or a new toilet facility be built.
- v. Traders also requested the installation of four additional solar lights to improve security and enhance operations during early mornings and late evenings.

Committee's recommendations

The County Ministry of TIMIC should:-

1. Rehabilitate the Non-Functional Market Structure-Repair the damaged roof and cracked walls to restore usability and prevent further deterioration.
2. Improve Sanitation Facilities-Expand the existing ablution block or construct a new toilet facility to meet current demand and maintain hygiene standards.
3. Enhance Lighting and Security- Install four additional solar lights to support safe and extended trading hours, especially during low-light periods.

VII. NGUNI MARKET SHED

Mr. Speaker Sir,

The Committee was received at Nguni market by the area MCA Hon. Jeremiah Mutua, accompanied by his Personal Assistant and made the following observations:

- i. **Water Shortages:** The committee was informed that the market is currently experiencing acute water shortages due to the breakdown of the nearby sump well's pump. Traders requested long-term water solutions such as the drilling of a borehole or repair/replacement of the sump well system.
- ii. **Poor Road Access:** Business owners and traders expressed concern over the condition of the access road surrounding the market, particularly the stretch from Nguni Petrol Station to the market and its connection to the highway. They reported that the road is impassable, especially at night and during the rainy season.
The traders request tarmacking or a dustless surface treatment to improve accessibility.
- iii. **Rainwater Management:** The committee noted a pressing need for the installation of gutters to facilitate rainwater collection. The lack of proper drainage currently leads to significant challenges during rainfall.

Committee's Specific Recommendations

The County Ministry of Trade, Industry, MSMEs, Innovation and Cooperatives should:-

- i. **Implement a Sustainable Water Supply System:** Drill a borehole with a solar-powered pump to provide consistent water access, reduce reliance on the faulty sump well, and lower operational costs through renewable energy.
- ii. **Upgrade Road Infrastructure for Market Access:** Tarmac or apply a dustless surface treatment to the road from Nguni Petrol Station to

the market to improve accessibility, enhance safety, and support local trade, especially during rain and nighttime.

- iii. **Install Rainwater Harvesting and Drainage Systems.** Equip market buildings with gutters, downpipes, storage tanks, and proper drainage channels to prevent flooding, conserve rainwater, and provide an extra water source for cleaning and sanitation.

VIII. LUNDI MARKET SHED IN MUI WARD.

Mr. Speaker Sir,

The committee, accompanied by the MCA's ward assistant officer, visited the Lundi market shed. The following submissions were made by the Mama Bongas and other stakeholders present at the market:

- i. That a functional market shed was constructed during the 2016/2017 financial year. Additionally, a water point was established in the 2024/2025 financial year, sourcing fresh water from a sump well located in the nearby river.
- ii. The presence of four operational pit latrines constructed during the 2023/2024 financial year. However, concerns were raised regarding the lack of fencing around the market shed, the absence of solar lighting, and there were no market cleaners currently employed.
- iii. The community expressed dissatisfaction with the pricing of water. They reported that a 20-liter jerrican was being sold at Ksh 5 and requested that KIMWASCO consider reducing the price to Ksh 2.50.
- iv. Furthermore, the community requested that the water supply be extended to nearby schools, hospitals, and homesteads to enhance access for all.

Committee's Specific Recommendations

The County Ministry of TIMIC should:-

- i. Erect perimeter fencing around the market shed to enhance security and delineate the facility.

- ii. Install solar-powered lighting along pathways and key areas to extend operating hours and improve safety.
- iii. Recruit and train dedicated market cleaners to maintain hygiene standards and reduce sanitation risks.
- iv. Collaborate with KIMWASCO through the Ministry of Water and Irrigation to revise the jerrican price from Ksh 5 to Ksh 2.50 and negotiate subsidized rates for nearby schools, hospitals, and homesteads.

IX. TSEIKURU MARKET SHED

Mr. Speaker Sir,

The committee visited the Tseikuru market shed on Saturday, 5th July 2025, a facility constructed during the financial year 2014/2025. The visit was part of an ongoing oversight and engagement initiative aimed at assessing the functionality and impact of county-funded infrastructure projects.

The Committee was received by the Ward Administrator and the Village Administrator alongside the Tseikuru Market Committee, led by the Chairperson.

The visit provided a platform for dialogue between the elected leaders and the local stakeholders. Notably, the Tseikuru market was acknowledged as the highest revenue-generating market in the county. Its catchment includes traders from Mwingi Central, Kyuso, Ngomeni, Tharaka, and parts of the neighbouring Meru and Tharaka Nithi counties.

Members of the public made the following submissions to the Committee;

- i. **Drainage Issues:** During the rainy season, poor drainage severely disrupts business operations and poses health risks to both traders and nearby residents due to increased exposure to waterborne diseases.
- ii. **Waste Management:** The Market Committee urged the Ministry of Trade, through the committee to address the issue of waste disposal by designating a dumpsite, providing waste bins and collection trucks.

- iii. **Transport and Revenue Management:** The committee was informed that there is a need to establish a bus park to streamline transportation and enhance efficiency in revenue collection.
- iv. **Establishment of a formal Tseikuru Town Administration** to enhance governance and accelerate development efforts in the area.
- v. **Market Infrastructure Enhancements:**
 - o Undertake spatial planning of the market to improve the organization
 - o Create a welcoming and accessible main entry point
 - o Install additional solar lighting
 - o Repair and maintain existing non-functional solar lights
 - o Market fencing reinforcement, gate repairs, and the provision of water through a sump well from the nearby river.
 - o Installation of water facilities. This initiative aims to create a more conducive environment for both traders and customers.

Committee's Specific Recommendations

- i. Improve the market's drainage system by excavating and lining key channels, installing soak pits at low points, and instituting a quarterly maintenance schedule to prevent flooding during the rainy season.
- ii. Roll out an integrated waste management plan that includes a designated dumpsite, strategically placed bins, and a reliable collection rota supported by additional trucks and trained staff.
- iii. Formally establish the Tseikuru Town Administration with clear mandates for market oversight, budgeting, and development planning, ensuring faster decision-making and coordination with the Ministry of Trade.
- iv. Create a dedicated bus park adjacent to the market with defined parking bays, revenue-collection kiosks, and sheltered waiting areas to streamline transport flows and boost ticketing efficiency.

- v. Redesign the market layout through spatial planning to optimize stall placement, construct a clear main entrance, reinforce fencing and gates, install new solar lighting and repair existing units, and develop a river-fed sump well alongside water-point facilities for traders and customers.

CHAPTER THREE

3.0 GENERAL OBSERVATIONS

Having undertaken a successful inspection exercise, the Committee came up with the following general observations;

- i. The market lacks essential amenities such as toilets, reliable solar lighting, water tanks, and protective railings—posing serious risks to public health and safety. These deficiencies not only compromise usability but also hinder local economic activity, demanding immediate and targeted infrastructure upgrades..
- ii. While the market shed has sparked community optimism and the potential to uplift informal trade, its long-term impact depends on addressing gaps in public health, safety, and access.
- iii. Non-functional water tanks, inadequate lighting, and a lack of shade indicate a long-standing neglect of basic services, which directly impacts trader welfare and market operations.
- iv. The Mutha livestock yard serves as a key economic hub, yet its informal structure and inadequate facilities limit its efficiency and revenue potential. Formalizing its operations and investing in infrastructure could unlock significant economic benefits for the region.
- v. Legal Ambiguities and Land Security Threaten Project Viability-the ongoing familial disputes, unclear land titles, encroachment risks, and ambiguous allocation processes jeopardize the viability of development projects. Transparent land verification and inclusive planning are essential to protect public assets and ensure timely implementation.

CHAPTER FOUR

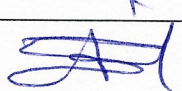

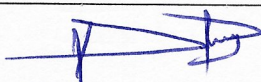

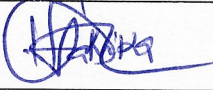

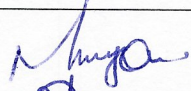

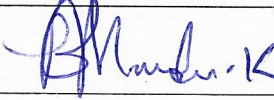

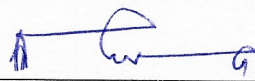

4.0 COMMITTEES RECOMMENDATIONS

Owing to the above general observations, the committee recommends as follows;

1. The County Ministry of TIMIC should formalize the acquisition of the Mutha livestock yard land through purchase. Securing the land title will enable the installation of a secure perimeter fence with controlled access points, streamline revenue collection, enhance livestock management and lay the groundwork for essential infrastructure such as washrooms and water reservoirs.
2. The County Ministry of TIMIC should act swiftly to authenticate land titles and carry out beaconing procedures. Any arising disputes should be resolved promptly to pave way for the seamless development of the land."
3. The Ministry of TIMIC should prioritize the revitalization of existing markets by investing in essential infrastructure upgrades—such as modern sanitation facilities, flood lighting, reliable water storage systems, and secure fencing. These enhancements will foster a more vibrant and hygienic environment for commerce, while laying the groundwork for sustainable and inclusive trade development.

ANNEX I

We, honorable members of the Committee on Trade, Industry, ICT and Cooperatives, do hereby affix our signatures to this Report on the County Inspection Exercise to affirm its accuracy, validity, and authenticity: -
