

COUNTY GOVERNMENT OF KITUI

COUNTY TREASURY

COUNTY FISCAL STRATEGY PAPER

2021/2022 FINANCIAL YEAR

*STRATEGY FOR RESILIENT AND SUSTAINABLE
ECONOMIC DEVELOPMENT*

FEBRUARY 2021

FOREWORD

The 2021 Kitui County Fiscal Strategy Paper (CFSP) builds direct linkages between policies, plans and budgets, and sets the County Government priority programs to be implemented through the medium term period 2021/2022– 2023/2024. It provides an overview of recent economic development and outlook as well as expenditure ceilings for County Departments, units and agencies and detailed guidelines that are aimed at structuring County Government expenditure towards prevalence areas. The programs and policies herein reflect the concerns of the Kitui Citizenry and are anchored under the approved CIDP 2018-2022 and the 2021/2022 Annual Development Plan.

The theme for development for FY 2021/2022 will be *Strategy for Resilient and Sustainable Economic Development* the Government has prioritized programs aimed at increasing the household income amidst the Covid-19 pandemic. This will be through accelerating rural economic development through investment in the productive sectors of the economy, Promotion of savings and investment among the households and Public sector restructuring and reorganization to enhance efficiency and productivity.

The County's poverty index is 62 Percent with a level of food sufficiency of 51 Percent. In order to invest in the productive sectors of the economy, the Government has prioritized interventions geared towards enhancing the county agricultural production, which actually contributes 87.3 Percent of income to the rural population. The Government will also be keen in enhancing value addition for agricultural products, which is has overtime increased household income and generated employments for women and the youths. The Government aims at enhancing community involvement in development, which will be outlined in the cluster community action plans. This will ensure communities are active participants in development and in long run become economically self- reliant.

In the FY 2021/22, the total revenue collection is projected to decrease to Kshs 11,749,195,524 from Kshs 11,839,810,619 in the FY 2020/21. The decrease is associated with projected reduction in grants. 90.4 per cent of the revenues represents the equitable share while county generated revenues, grants and conditional allocations represents 5.2 percent and 4.4 per cent respectively of the total projected revenues.

This document is aligned to the Budget Policy Statement (BPS) 2020/21 prepared by the National Treasury which sets out the national broad strategic priorities and policy goals guiding budget preparation for the next financial year at the national level. It is a requirement to subject the proposals to public scrutiny as a way of ensuring transparency and accountability. In this regard, public participation on the paper was conducted and the views arising thereof taken on board. Further, the draft CFSP has also been approved by the County Budget and Economic Forum (CBEF) and their views also incorporated. The report was shared with the Commission on Revenue Allocation (CRA). Their inputs and positive criticism has gone a long way in shaping this paper.

As we translate to the budget for FY 2021/22, sectors will be required to develop their programme concept notes to support the development outcomes envisaged in this County Fiscal Strategy Paper. In this regard, all sectors should ensure their program-based budgets are supported with the concept notes and expenditures are outcomes oriented.

Going forward, emphasis will be done to enhance our resource mobilization strategy in the medium term. This will be effected through setting up required policies and laws to support PPP investments, development partnership and borrowing to fund the key flagship and strategic interventions as prioritized in the Vision 2030 and CIDP 2018-2022 for socio economic transformation of the county. The County Government proposes to allocate more resources to programmes and projects targeted towards addressing water provision challenges; access to affordable, accessible and quality health care and infrastructural developments especially in the road sector.

ACKNOWLEDGEMENT

The 2021 County Fiscal Strategy Paper has been prepared in compliance with the provisions of Section 117 of the Public Finance Management Act, 2012. It outlines the current state of the economy, provides fiscal outlook over the medium term and specifies the set strategic priorities and policy goals together with a summary of the Government spending plans, as a basis of the FY2021/22 budget. The Government will continue to sensibly manage use of public resources over the 2021/22-2023/24 Medium Term Expenditure Framework (MTEF).

The preparation of the 2021 CFSP was a collaborative effort of various Government Departments, Government partners, members of the public and other stakeholders. We are very grateful for their inputs. We thank all the spending units, the Ministries, Government Departments and Agencies for timely provision of information.

We express our gratitude to the leadership of H.E the Governor, H.E the Deputy Governor and the entire County Executive Committee members for their support and inputs. Special appreciation goes to the entire County Budget and Economic Forum (CBEF) for their inputs and comments, in addition to comments from the public and input from all county ministries.

8. The County Treasury shall publish and publicize the County Fiscal Strategy Paper within seven days after it has been submitted to the County Assembly

I. INTRODUCTION

1.1 Overview

1. The County Fiscal Strategy Paper (CFSP) 2021/2022 has been prepared by taking cognizance of the 2020/2021 Economic outlook and the five Pillar county development agenda namely: Food and Water; Healthcare; Education and Youth Development; Women Empowerment and Wealth Creation. Further, the paper seeks to give a framework for implementation of programmes and projects prioritized by the citizens. The paper is aligned to the Vision 2030, the 3rd Medium Term Plan, the United Nations Sustainable Development Goals (SDGs), national government policies and guidelines as communicated through various circular's, the 2021/ 2022 Budget Policy Statement (BPS), the approved County Integrated Development Plan (CIDP) 2018-2022 and the County's Annual Development Plan for 2021/2022 FY.

2. The 2019/20 County Budget Review and Outlook Paper (CBROP) has also been a key point of reference in the preparation of this document. The previous financial year's fiscal performance as analyzed in the CBROP has indicated an improvement in the absorption rate of development funds from 84% to 86% implying an economic growth. This information is crucial in informing future performance projection and the choice of broad fiscal parameters.

3. Additionally, the policy paper benefited from feedback from members of the public and other interested stakeholders. It will serve as a guide in the preparation of the budget estimates for FY 2021/22.

4. The paper highlights programmes, policies, strategies and activities while at the same time underpinning the structural reforms required for actualization of the County Government of Kitui five (5) development Agenda.

5. Capacity in Public Financial Management (PFM) will be strengthened to improve governance and this will underpin our achievements on the objectives of fiscal discipline and sound financial management. With improvement in management of resources coupled with clarity of vision and strategic planning, the County will sure to achieve improved service delivery, create more jobs and wealth for better livelihoods of our people amidst the Covid-19 pandemic. This is particularly important because Kitui County has been both food and water insufficient with various interventions now bearing fruits despite the adverse effects of the Covid-19 pandemic and the pandemic containment measures alongside the poor weather conditions, a common phenomenon in the County. During the second quarter of 2020/21, the County received moderate rainfall and the farmers are expecting moderate harvest despite the

Locust outbreak. Despite rampant un-employment and under-employment (particularly among the youth and women), and the lack of formal cash crop (s), Kitui County residents are now hopeful into the future due to many impactful programmes currently being rolled out to combat the adverse effects of the Covid-19 pandemic and the destructive desert locusts, thus calling for very prudent fiscal discipline, policies and well-designed programmes to realize the full benefits and meet the high expectations.

6. Additionally, deliberate efforts will also be undertaken to grow the local revenue base, seal all leakages while at the same time develop new and innovative ways of generating additional revenue. To stimulate the full realization of the five agenda manifesto, the County Government will aggressively seek the support of development partners, while at the same time identifying projects and activities with the highest potential to generate wealth.

7. Further, the County Government will continue using programme based budgeting with the view to formulating and prioritizing expenditure plans and budgets within the available resource envelop; with public participation being the hallmark of the development of this Fiscal Strategy Paper as well as in the development of the Annual Budget. By so doing, both ownership and sustainability of the programmes and projects identified for implementation will be assured.

1.2 Strategic Commitment

8. The period 2021/2022 FY and the years to follow, the County Government of Kitui Strategic commitment is to continue rolling out various programmes, projects and activities with the highest potential for high economic and social impact over the medium term. These development interventions will be in line with the five pillar County development agenda of Food and water, healthcare, education and youth development, women empowerment and wealth creation as identified by the public through the various forums held. Major areas of focus will be ensuring provision and access to water, universal health care and the road infrastructure. Other areas will include value addition in the livestock sector, textile sector, agribusiness and empowerment programmes.

1.3 The Value Chain Approach

9. The County Government will continue to support farmers to produce according to the market demand and supply of products and services. The value chain approach will enable the producers to improve the quality of the products and ensure high prices at the end line with minimal cost of production. The County Government will ensure that information and training on value chain is available to the producers.

10. Value Chains are about Products, Processes and People. During the 2020/21 FY, the County Government plans to continue supporting producers directly right from operations at the farm level/production through: increasing agricultural output and productivity, reduction of pre and post-harvest crop losses, mechanization of farming activities; intensification and commercialization of small holder agriculture, planting of certified seeds; supply of subsidized fertilizers timely use of appropriate pesticides; and complete post-harvest management services (transport / logistics related to bulking and to the final market/ marketing outlets; value addition, branding and marketing).

11. To achieve this, deliberate efforts will be put on organized groups (including faith based organizations, youth groups, women groups) and encourage them to transform themselves into sector focused Co-operatives, with special focus to value addition and access to local, regional and global markets.

12. During the FY 2020/21, the County Government also plans to invest heavily on capacity development through applied training / learner centered knowledge diffusion with the view to ensuring that, regardless of one's previous academic background, a critical mass of people from Kitui acquire practical skills alongside the specific value chains identified above. Through Vocational training Centers, Co-operatives, Financial Services Associations (FSAs), and other credit giving institutions, the County Government plans to ensure that there is affordable credit for our women and youth for wealth and income generation.

1.4 Ministry of Infrastructure, Housing, Transport and Public Works

1.4.1 Roads

13. To support and unlock the country's potential in contributing to the national economy and supporting wealth creation within the County, the County will continue to invest in road maintenance and repairs of both rural access and urban roads to improve connectivity and enable farmers and traders access markets for their produces/commodities faster and cheaply. This will be achieved through routine repairs and maintenance of roads and related infrastructure like bridges, drifts and culverts, bush clearing and grading programme.

14. In the FY2021/2022 county government will carry out upgrade of roads in specific towns to bitumen standards under dustless town program in an effort to support business activities and reduce dust levels in these towns.

1.4.3 Housing

15. The housing situation in Kitui County is characterized by an acute shortage of affordable housing. This situation is exacerbated by the rapidly rising rural urban migration in search of work, business opportunities as well as modern living and the low percentage of individuals within the County who are engaged in gainful economic activity. The County will improve efficiency in house provision and safe disposal of asbestos waste within Kitui County. To enable construction of decent housing units, the county will develop a comprehensive housing programme to be implemented through a joint venture arrangement to incentivize low cost housing.

1.5 Ministry of Lands and Physical

1.5.1 Land Development

16. As a factor of production, land is critical to economic, social, political and cultural development. Secure access to land and its sustainable use remain significantly important for employment creation, food security and the socio-economic development of the county. In order to support the attainment of the county manifesto, the county will assist to fast track issuance of title deeds and settlement of land adjudications as well as undertake physical planning through proper engineering and design plans of Mwingi, Mutomo, Kyuso, Zombe, Kwa Vonza towns and Kanyangi.

1.6 Health and Sanitation

17. In the forthcoming FY2021/22, the Ministry will continue to enhance healthcare access in the County. Already the Ministry has operationalized the 2018-2022 Medium Term County Health Sector Strategic Plan to guide it on key priority areas to ensure quality health care in the County.

18. To enhance access to healthcare, reduce out-of-pocket expenditure on health and to ensure quality of healthcare, the County rolled out Kitui County Health Insurance Cover (CHIC) programme. Towards this, the Ministry will continue scaling up Kitui County Health Insurance Cover (KCHIC) through mobilization and ensure prompt printing of members cards through the procured KCHIC registration software. This programme will be complemented by other health insurance covers including NHIF. Towards this reason, the Ministry will continue mobilizing Kitui people to scale up the uptake of health insurance cover. Additionally, the national government through the Ministry of Health is rolling out

Universal Health Coverage programme countrywide to complement the County interventions. The number of people accessing health care has more than doubled since KCHIC was rolled out. Other programmes being undertaken include:

a) Expansion of other county hospitals. The county has embarked on expansion of the other 12No. Hospitals with the view of improving service delivery in the facilities. This involves operationalization of maternity theatres in Tseikuru and Migwani hospitals, operationalization of X-ray machines in Nuu, Mutitu, Kyuso, Zombe and Ikanga among other activities.

b) Kitui County is one of the vastest counties in the country, covering 30,540 km². Consequently, there are some areas where people walk for long distances to access health care. The ministry will continue to operationalize addition of new health facilities in those underserved areas. This involves completion of construction works of the facilities, staffing and equipping them to make them operational. Additional 17 new facilities have been opened and supported by the County.

c) Installation of health information management system (HIMS) in all the 14 hospitals in the county is ongoing. This will improve on data management in the hospitals.

d) To enhance leadership and governance in the sector, the Ministry has in the process of implementing Health Facilities Management Bill to streamline management of health facilities across the county. For this reason, the process of establishing health facilities committees is ongoing. At the County level, Kitui County Health Management Board has been operationalized.

19. To ensure a healthy and productive County, as envisaged in the Ministry's Vision, there is need to address various health gaps. These health gaps include:

a) Inadequate budgetary allocations to the ministry has led to phased implementation of the programmes, sometimes leading to increase in estimated costs

b) Poor flow of funds to the Ministry; coupled with liquidity problems at the County Treasury has seriously affected timely implementation of activities.

c) Inadequate staff in all cadres

d) Delays in projects documentation and procurement process by technical departments leading to delays in implementation of the projects. Sometimes the bills of

quantities (BoQs) do not capture all the major aspects of the project resulting to variations to make the projects usable. These results to increase in project costs and delays in implementation.

e) Inadequate projects supervision by the technical departments leading to delay in projects completion and sometimes low quality works

20. For smooth management of the Ministry affairs, Health Facilities Management Committees are being revamped for better performance. These facility committees will be supported by the Sub County Health Management Teams (S/CHMTs) and County Health Management Team (CHMT). Further, the County Health Management Board will be strengthened to ensure it performs her responsibilities effectively.

21. To reduce high burden of both communicable and non-communicable disease, the ministry will revamp the Community Health Strategy. This is a community based promotive and preventive health services. To make this more effective, the County will engage Community Health Volunteers (CHVs) and equip them with the relevant resources and skills.

1.7 Ministry of Agriculture, Water and Irrigation

22. Kitui County is located in Semi-Arid area where rainfall is usually minimal throughout the year hence rain-fed agriculture faces serious draw back for growing both food and cash crops, with cyclical drought and famine being the norm than the exception. With increasing negative effects of climate change now being a reality in Kitui County, deliberate efforts will be made to tap seasonal rivers by constructing dams to ensure that water is available for use by residents during dry seasons. During the second quarter of 2020/21 the county received moderate rainfall. The county is expecting moderate harvest but the threat of locusts' outbreak in some parts of County is expected to reduce food production. The County Government and the National Government will work hand in hand to control locust by spraying with pesticide using Airplane.

23. Kitui county has a population of 1,136,187 (Kenya National Bureau of Statistics Report, 2019) whereby 55% has access to clean and safe drinking water with the rest of the population (45%) relying on unimproved sources like open wells in several seasonal rivers within the county.

24. The sources of water are ground water (drilled and equipped boreholes), perennial and seasonal Rivers with pipeline networks and other civil works. Projects already in place include; Masinga-Kitui & Kiambere-Mwingi water supplies, Athi- Mutomo pipelines among others, shallow wells, protected springs, Earth dams and sand/subsurface dams.

25. Kitui County is water deficient despite its potential presented by the seasonal run-off and streams and the unexploited ground water and the need to further develop the potential sources in order to serve more people and underserved areas.

26. The projects will be implemented through contracts, drilling of boreholes by use of county acquired drilling rigs and Earth dams desilting/construction through contracting and also Agricultural Mechanization services (AMS) machinery. During the FY 2021/2022, deliberate efforts will also be made to lay the ground work for irrigated agriculture under 40 irrigation clusters along river meanders. Efficient use of water resources to increase area under irrigation development and re-habitation along rivers (Wikithuki, Athi, Kilawa and 40 irrigation clusters), micro irrigation schemes will be developed around dams, riverine areas along seasonal rivers, shallow wells and weirs. *Myanda* irrigation will continue to be given priority to ensure that farmers improve production of high value horticulture crops like tomatoes, onions, water melons, spinach, chilies, coriander and local vegetables among others. The government will also support Mbondoni water project in Mwingi West.

27. The County proposes to utilize available land to enhance food security and wealth creation of Kitui citizenry during FY 2021/2022. To increase Agriculture production, food and nutrition security the County plans to purchase certified seeds for farmers in a timely manner to facilitate timely planting and quality yield for drought and disease resistant crops. The ministry will continue promoting agriculture mechanization service. This will promote productivity and mechanization of farming activities for improved crop production. There will also be establishment of ndengu processing plant and honey processing plant to support farmers. The plan to support livestock farmers and traders has already been alluded to under the value chain approach.

28. Cotton production will be prioritized to provide raw materials to Kitui County Textile Centre (KICOTEC) to complete the value chain, the concept of forward linkage with the garment factory. To enhance production and productivity, the County shall support farmers with quality seeds, pesticides, marketing and value addition.

29. Sorghum is best suited to the local climate. In FY 2020/21, the ministry will promote Sorghum production and utilization. Sorghum is grown in all the eight sub counties although concentration is more on the agro-ecological zones LM4, LM5 and IL5 where large tracts of land can be readily available for investment in the crops. To enhance production and productivity, there will be need to invest in quality seeds, marketing, utilization and value addition.

30. Access to adequate supply of clean water is fundamental for the achievement of the first pillar of the County Government of Kitui manifesto. Indeed, adequate safe drinking water and sanitation do compliment efforts towards improved primary health care and productivity of labor. In addition, adequate supply of water is essential for increased agricultural production. For this reason, the county will continue to invest in clean water supply, prioritize construction of earth dam, pipe line extension, borehole drilling and repairs and water pans across the county as well as completing the ongoing water projects in urban and rural areas in order to increase the number of people connected to clean water. In addition, the county will continue to expand sanitation infrastructure in urban areas within Kitui Municipality and Mwingi Town administration.

1.8 Ministry of Livestock, Apiculture and Fisheries

31. In FY 2020/21, the ministry will scale up improvement of local livestock breeds. This will be undertaken through sensitization of farmers, use of hormones to synchronize ovulation and use of artificial insemination. This programme aims at increasing meat and milk productivity using the locally available breeds. This programme will further be supported by a livestock disease management programme. The later programme will address the high threats of vector borne diseases which lead to poor animal health and high mortality rate hence affecting livelihoods. The county shall support the farmers with acaricides, spray pumps (manual and motorized), carry out disease surveillance, procure an assortment of vaccines and sera to cover common and frequent disease outbreaks and carry out vaccination

32. In addition the department intends to provide high quality cocks for breeding and Galla and dairy bucks, pasture seeds for feed production and seed multiplication as well as building capacity of farmers. Also the ministry will undertake Range Improvement Programme; Capacity building of farmers and provision of fencing, soil

conservation and water harvesting materials, Construction of sample storage structures and procurement of grass harvesting equipment. The ministry intends to provide farmers with modern bee hives for apiary establishment and honey extraction equipment.

1.9 Ministry of Basic Education, ICT & Youth Development

33. The education, ICT and Youth development sector continues to work towards achieving its overall goal of equipping Early Childhood Development Education (ECDE) to improve the quality of ECD education, promoting youth development and integration of ICT in all County government operations.

34. In order to improve access to education and support the national government policy of 100% transition from primary to secondary schools the ministry will continue to offer bursaries and scholarships to support bright but vulnerable students to complete their secondary and university education.

35. To mitigate the high unemployment rate among the youth, the County will continue to make deliberate efforts to support out of school youth to acquire technical skills which increase their chances of getting employment or starting their own small businesses. Towards this end during the FY 2021/2022 the county government will rehabilitate and equip existing Vocational Training centers (Youth Polytechnics) with training tools and equipment to provide out of school youth with increased access to Vocational skills training. In addition, the government will continue to partner with key strategic partners including National Industrial Training Authority (NITA), International labor Organization (ILO), Toolkit Institute, among others, to develop and implement tailor made short intensive work based skills development programmes for the youth to enhance their employability status.

36. In order to provide youth acquiring basic technical skills with an opportunity to advance their careers by undertaking specialized courses the Ministry plans to establish and equip one Skills Training Center of excellence to offer advanced Technical Training and applied research courses at Certificate and Diploma Levels.

37. On ICT, the county will continue to leverage on ICT to improve service delivery through initiatives such as e-procurement, IFMIS, revenue automation and online tracking of county programmes and projects. Further, the county will continue to increase online access to government publications and information through digitizing government records and expanding the available ICT infrastructure.

38. The government is committed to promoting an active reading culture in the County. Towards this end the ministry proposes to construct and equip one library facility and youth resource center within Kitui town as a multi-year project. This facility will provide school going children with opportunities for reference materials, study and research resources, as well as provide youth with supportive services such as career guidance, job applications and unlimited internet services.

39. The County Government recognizes the role played by Information and Communications Technology (ICT) to drive social economic development. In the 2021/2022 FY the government will seek to integrate ICT in its operations and service delivery programmes and promotion of e government services. The sub sector will undertake development of ICT infrastructure at both county offices and sub county levels to support service delivery, e-government use and adoption.

1.10 Ministry of Trade, Co-operatives and Investments

40. The Ministry of Trade, Cooperatives and Investment aims to provide an enabling business environment through appropriate incentives and innovation to promote trade, industry and viable cooperatives for job and wealth creation. This has been achieved through strengthening the cooperative movement, initiating various business enterprises and promoting the viable value chains within the County.

41. The Kitui County Textile Centre (KICOTEC) set up in Syongila Polytechnic aims to promote people's livelihoods by ensuring Kitui wealth is retained within its borders. Over 700 youths have been equipped with skills and knowledge and employed at the Factory of which 82% are women. So far, school uniforms have been made at affordable prices and of high quality for various institutions within the county. This has reduced the burden on the parents and the generated savings now being used for other economic activities. The County government has partnered with the National government through the ministry of interior and coordination to produce police, chiefs and assistant chiefs' uniforms. The County government also plans to set up other textile industries in Mwingi and Mutomo. In 2019/20 financial year, KICOTEC declared a profit-before tax of Ksh 8.4m which was reinvested.

42. The Ministry has set up a ballast crushing plant in Kyusani, Kitui Rural Sub County to exploit the huge deposits of ballast making raw materials. Currently, the plant has engaged some 5 staff performing different roles; operators, electricians, casuals etc. Around 1000 community members are expected to benefit from the plant directly in form of

sale of stones/boulders to the crusher. Other benefits will accrue to hotels and estate managers (house occupancy). The plant will continue creating employment for various relevant professionals, promote use of local construction materials and increase revenue collection in the County.

43. In FY 2021/22, the Ministry will continue with the programme of modernization of markets and the Jua Kali industry. To empower the residents of Kitui County, the ministry will continue to allocate funds to the County Empowerment Fund and support establishment of the County Investment Corporations. The ministry will also undertake a multi-year project of construction of a county abattoir at Kanyonyoo area. In this line the government will also support leather and shoe making factory and as a result create more job opportunities to the youth.

1.11 Ministry of Environment, Tourism and Natural Resource Management

44. The Environment, Tourism and Natural Resource Management is committed to bring about transformation of the livelihoods of the community by providing affordable, reliable and secure energy to enable drive the other pillars of the county development blue print. This includes affordable energy supply to water supply installations to improve food production and water sufficiency in the rural areas, electrification of early childhood and vocation training centers towards education and youth empowerment, power supply to rural trading centers to boost small and medium scale business enterprises towards youth and women empowerment and wealth generation. The ministry is also actively implementing national determined commitments (NDCs) in an attempt to roll back the impacts of climate change and variability. We are committed to provision of the basic right to all citizens in access to clean and healthy environment while providing a conducive environment for investments in the county minerals sector.

45. To counter the serious threats posed by climate change, the County will continue to enhance mitigation and adaptation measures. In particular, the County has set up the Kitui County Climate Change Fund through regulations that have already been approved by the County Assembly. The fund will be key in mobilizing climate change finances from both national and international levels. Continuing with these efforts and with the aim of avoiding health and environmental effects of deteriorating climate, the county government enforced a charcoal and sand transportation ban for commercial use of these resources outside the county. So far, the ban has been a major milestone, earning the county international recognition for the efforts and the good results yielded. Going forward, the county will continue to enforce the ban and mainstream climate

change mitigation measures such as tree planting programmes and supporting the local population in the affected areas with alternative economic income generating activities such as brick making using modern technology kilns and briquette making. To promote the skills of local artisanal miners and increase the value of their products, the county will commit more resources to construct and equip a mineral lab in the county.

46. In the 2021-2022 FY, the County Tourism department proposes to market Kitui County as a Tourist destination through completion of Kalundu Eco-Park as world class recreation and sport tourism facility. During the said financial year, the county in addition to Ikoo valley, will promote other heritage sites as tourist attraction sites like Nzambani Rock, Yanzuu and Kavia through provision of water and other necessary tourism infrastructures. The Tourism department will seek to rehabilitate South Kitui National Reserve, Mwingi National Reserve, enhance Wildlife Conservation at Kanyonyoo and assist interested parties in establishing community owned conservancies.

47. Further, the department will seek to complete and operationalize Mutomo Reptile Park, support community Ecotourism projects in Mutitu, Mumoni hills and conduct various tourism Promotion and Marketing activities.

1.10 Ministry of Gender, Sports and Culture

48. Gender mainstreaming is key to the inclusion of marginalized groups in the development of the County. The County Government will continue to emphasize the importance of this through the adoption of the proposed Gender Policy and the implementation of the proposals contained in the policy. These will include enhancement of participation of women youth and PWDs in leadership and governance structures within the County of Kitui. Measures will be taken to ensure enhancement of access to resources so that these groups can expand their Income Generating Initiatives. The County Government of Kitui will also address the issue of Gender Based Violence through the establishment of rescue centers for people threatened or suffering violence and need safety. Robust and grassroots based awareness programs will be carried out to sensitize the community on the need to embrace parity and shunning practices that contribute to gender based violence in the communities. This messaging will also address the promotion of helplines where members in distress can call toll-free and get help.

49. Community empowerment especially women, youth, and people with disabilities will be facilitated. This shall be effected through the collaboration of county

government with national government and other partners. The County Government will establish an empowerment fund to support women entrepreneurs. Continuous training of groups will be undertaken to enhance their capacities to manage Income Generating Activities.

50. In sports, the County Government will develop sports facilities in the county. This will involve the establishment of stadia, high standard sports grounds and related facilities in the county. All these spaces will be fitted with modern facilities so that local talent may be nurtured in competitive environments. A robust sporting talent development programme will be implemented in partnership with Sports Federations to tap talent from the village up to the County level and thereafter support the youth so identified nationally and internationally. The sports department will work with clubs to ensure adequate supply of uniforms, balls and other equipment that may be required for the full realization of their potentials. The County Government targets to have a playground with dais in every ward.

51. On Culture, the County Government proposes to preserve, develop and promote culture within the county for purposes of posterity and also as a tourism product. This will be done through the establishment of Ikutha Early Christianity Route through the preservation of the graves of the first missionaries to Kitui. The government will also gazette and develop Mulango Mission Houses constructed in the 1800s for their unique architecture and their significance as where education in the County took root, as well as Christianity. Rock Art preservation and promotion will be undertaken through the gazettement and rehabilitation of Kavea Rock. Recording of artists and involvement in the mainstreaming of gender as well as a robust women empowerment program will be undertaken. Promotion of talents, preservation of artefacts and support of traditional foods will be undertaken. The County Government will complete the Lower Eastern Heritage Center Gallery One, build the curator's residence, carry out landscaping works and operationalize the completed gallery. The department shall also establish ablution block in the Recreational Park which is located between the County Commissioners Campus, The Law Courts and The Lands Department. This will facilitate the safe and convenient use of the park.

52. In 2021/2022, the department will operationalize the kitchens in Kyoani and Mwingi Resource Centers for the facilities to start earning incomes for the County as members of

the public can now use them for functions such as meetings, weddings, church meetings and other related meetings.

1.11 The County Treasury

53. Achievements of the county manifesto necessitates prudent management of available public resources. As such, the County Treasury will continue to strengthen expenditure control and improve the efficiency of public spending through strengthening of systems and PFM reforms with a view to enhancing transparency and accountability to provide fiscal space for financing priority programmes. The focus will be to fast track consideration of reports on budget implementation, audited accounts of the county and its agencies/ corporations, digitization of all payments, review of revenue sources, adoption of e-procurement and expanding automation of public service delivery systems. These activities will go a long way in entrenching good governance and ensuring accountability of public resources. A major focus to all this will be capacity building of our staff with the major area being on budgeting and financial reporting.

54. The priorities of Treasury operations in the FY 2021/2022 will be to facilitate all ministries/entities and offer with maximum support for effective implementation of the prioritized programmes. To achieve the objective, the County Treasury plans to train more staff through capacity building and technical assistance by mobilizing donor support which will ensure effective service delivery to the public. County planning requires real data for decision making. In the FY 2021/22 the ministry will continue updating the County Statistical Database that will inform the County Statistical Abstract. This will be done in partnership with the Kenya National Bureau of Statistics (KNBS).

55. To effectively and efficiently track implementation of development projects in the County, the ministry will roll out a comprehensive package of Monitoring and Evaluation (M&E) and uptake of County Integrated Monitoring and Evaluation Systems (CIMES). The M&E reports will ensure value for money in the County projects and programmes.

56. The County Treasury will continue to coordinate public participation for all policy documents of concern along the budget cycle. These comprise; the Annual Development Plan (ADP), the County Fiscal Strategy Paper (CFSP), the Finance Bill and the Budget estimates. To maximize our own source revenue and hence strengthen our revenue base, the County Treasury will continue to undertake a comprehensive

county revenue administrative reforms and legislative frameworks to guide revenue collection.

57. To mobilize resources, the County treasury will seek external financial support for implementation of capital projects. Further the County Treasury will develop risk management strategy.

1.12 Mwingi Town Administration

58. Mwingi Town Administration Fiscal Strategy Paper (CFSP) 2021/22 sets out the priority projects and programs to be implemented in FY 2021/22. These projects and programs will serve as a furtherance of the County development agenda in various ways. Efficient waste management as well as improved drainage system will ensure sanitation for wellbeing of county residents and by extension the whole country. Improved road infrastructure will ease the access to food markets by farm produce traders hence ensuring constant supply of food to the town demography. Besides providing parking lots, cabro paving will help in mitigating new infections of communicable respiratory diseases associated with dust. Lit town will be an avenue for promoting extended business hours and continued wealth creation to market merchants. Besides, lit back areas will result to improved security in residential areas. Conducive business environment will attract both low capital business investments mostly embraced by women and youth: and large business ventures by both local and external investors, which is vital for employment and wealth creation.

II. RECENT ECONOMIC DEVELOPMENTS AND MEDIUM-TERM OUTLOOK

2.1 Overview

59. In 2020, the Kenyan economy was adversely affected by the outbreak of Covid-19 Pandemic and the swift containment measures, which have not only disrupted the normal lives and livelihoods, but also to a greater extent businesses and economic activities. As a result, our economy contracted by 5.7 percent in the second quarter of 2020 from a growth of 4.9 percent in the first quarter in 2020. The economy is therefore estimated to slow down to a growth of around 0.6 percent in 2020 from the earlier projection of 2.6 percent in the 2020 Budget Review and Outlook Paper (BRPOP). Economic growth is projected to recover to 6.4 percent in 2021 due to in part, the lower base effect in 2020. In terms of fiscal years, economic growth is projected to grow by 3.5 percent in FY 2020/21 and further to 6.2 percent over the medium term.

60. The economy continues to register macroeconomic stability with low and stable interest rates and a competitive exchange rate that support exports. Year-on- year overall inflation remained within the Government target range of 5 ± 2.5 percent in December 2020 at 5.6 percent from 5.8 percent in December 2019. This lower inflation was mainly supported by a reduction in food prices.

61. The foreign exchange market has largely remained stable but partly affected by a significant strengthening of the US Dollar in the global markets and uncertainty with regard to the Covid-19 pandemic. Despite this, the current account deficit is estimated to improve to 5.1 percent in 2020 from 5.8 percent in 2019 mainly supported by an improvement in the trade balance.

2.2 Recent Economic Developments and Outlook

2.2.1 Global and Regional Economic Developments

62. The global economies have been devastated by the outbreak and spread of the Covid-19 Pandemic and the ensuing containment measures. As a result, the global economy is projected to contract by 4.4 percent in 2020 from a growth of 2.8 percent in 2019 (**Table 1**). This economic outlook is worse than the growth reported during the 2008 - 2009 global financial crisis.

63. Advanced economies are projected to contract by 5.8 percent in 2020 from a growth of 1.7 percent in 2019. Significant contraction of the economy is projected in the United States (-4.3 percent), Japan (-5.3 percent) and the United Kingdom (-9.8 percent). Growth in the Euro area is expected to contract by 8.3 percent in 2020 from a growth of 1.3 percent in 2019.

64. The emerging markets and developing economies are also projected to contract by 3.3 percent in 2020 from a growth of 3.7 percent in 2019. All major economies are projected to contract in 2020 except China which is projected to grow by 1.9 percent, a slowdown from a growth of 6.1 percent in 2019.

65. The Sub-Saharan African region has not been spared the negative impact of the pandemic with the region projected to contract by 3.0 percent in 2020 from a growth of 3.2 percent in 2019. The largest impact of the crisis on growth has been for tourism-dependent economies, while commodity-exporting countries have also been hit hard. Growth in more diversified economies will slow significantly, but in many cases will still be positive in 2020.

66. Growth in the East African Community (EAC) region is estimated to slow down to 1.0 percent in 2020 compared to a growth of 6.2 percent in 2019. This growth will be supported by positive growths in Kenya, Tanzania and Rwanda. Economic activities in Burundi and Uganda are expected to contract in 2020.

2.2.2 Domestic Economic Developments

67. Prior to the outbreak of Covid-19 pandemic, Kenya's economy was strong and resilient despite the challenging global environment. The broad-based

economic growth for 2018 and 2019 averaged 5.9 percent outperforming the 5.5 percent for the previous 5 years (2013 to 2017) and the average growth rate of 4.7 percent in the period 2008 to 2012 (**Figure 1**).

68. In 2020, the Kenyan economy was adversely affected by the outbreak of Covid-19 Pandemic and the swift containment measures, which have not only disrupted the normal lives and livelihoods, but also to a greater extent businesses and economic activities. As a result, our economy is estimated to slow down to around 0.6 percent in 2020 from a growth of 5.4 percent in 2019. Looking ahead, the economy is projected to recover and grow by about 6.4 percent in 2021 and above 6.2 percent over the medium term. **Figure 1:**

69. Per capita income rose from Kshs 113,539 in 2013 to Kshs 204,783 in 2019, a compounded annual growth rate of 11.5 percent. This enabled generation of around 827,000 new jobs per year in the period 2013 - 2019 up from 656,500 new jobs per year in the period 2008 -2012 (**Figure 2**).

2.2.3 Quarterly GDP growth of 2020

70. The economy grew by 4.9 percent in the first quarter of 2020 compared to a growth of 5.5 percent in the first quarter of 2019. The slowdown in quarter one was as a result of the decline in economic activities in most of the country’s major trading partners due to the uncertainty associated with the Covid-19 pandemic (**Table 2**).

71. The economy further contracted by 5.7 percent in quarter two of 2020 from a growth of 5.3 percent in the same quarter in 2019. The poor performance in the quarter was to a large extent negatively affected by measures aimed at containing the spread of the Covid-19. As a result, the performance of most sectors of the economy contracted in the second quarter of 2020. However, the economy was supported by improved performance of Agriculture, Forestry and Fishing activities), Health Services and Mining and Quarrying activities.

72. The agriculture sector recorded an improved growth of 6.4 percent in the second quarter of 2020 compared to a growth of 2.9 percent in the corresponding quarter of 2019. The sector's performance was supported by a notable increase in tea production, cane deliveries, milk intake and fruit exports. The sector's contribution to GDP growth was at 1.5 percentage points in the second quarter of 2020 compared to 0.7 percentage points over the same period in 2019 (**Figure 3**).

73. The non-agriculture (service and industry) sectors was adversely affected by the Covid-19 pandemic during the second quarter of 2020. As a result, the sector contracted by 8.5 percent in the second quarter of 2020 down from a growth of 6.4 percent in a similar quarter in 2019. The sector's contribution to real GDP was -5.6 percentage points in the second quarter of 2020 compared to a contribution of 4.3 percentage points in the same quarter of 2019.

74. Services sector contracted by 11.0 percent in the second quarter of 2020 compared to a growth of 6.8 percent in the same quarter in 2019. The decline was largely characterized by substantial contractions in Accommodation and Food Services (83.3 percent), Education (56.2 percent), and Transportation and Storage (11.6 percent). Growth in the service sub-sector was mainly supported by financial

and Insurance, Information and communication and Public Administration. The Services sub-sector contributed -5.4 percentage point to real GDP growth in the second quarter of 2020 compared to the 3.3 percentage point contribution in the same quarter of 2019.

Figure 3: Economic Performance (Contribution to GDP)

Source of Data: Kenya National Bureau of Statistics

75. The industry sector contracted by 1.0 percent in the second quarter of 2020 compared to a growth of 5.4 percent in the same quarter of 2019. This was mainly due to a decline in activities in the electricity and water supply and manufacturing sub-sectors. The industry sector was however supported by the Construction sector which grew by 3.9 percent in the second quarter of 2020. The industry sector accounted for -0.2 percentage points of growth in the second quarter of 2020 compared to 0.7 percentage point contribution to GDP in 2019.

2.2.4 Inflation Rate

76. Year-on-year overall inflation rate remained low, stable and within the Government target range of 5+/-2.5 percent since end 2017 demonstrating prudent monetary policies. The inflation rate was at 5.6 percent in December 2020 from 5.8 percent in December 2019. This lower inflation was supported by a reduction in food prices (**Figure 4**).

Figure 4: Inflation Rate, Percent

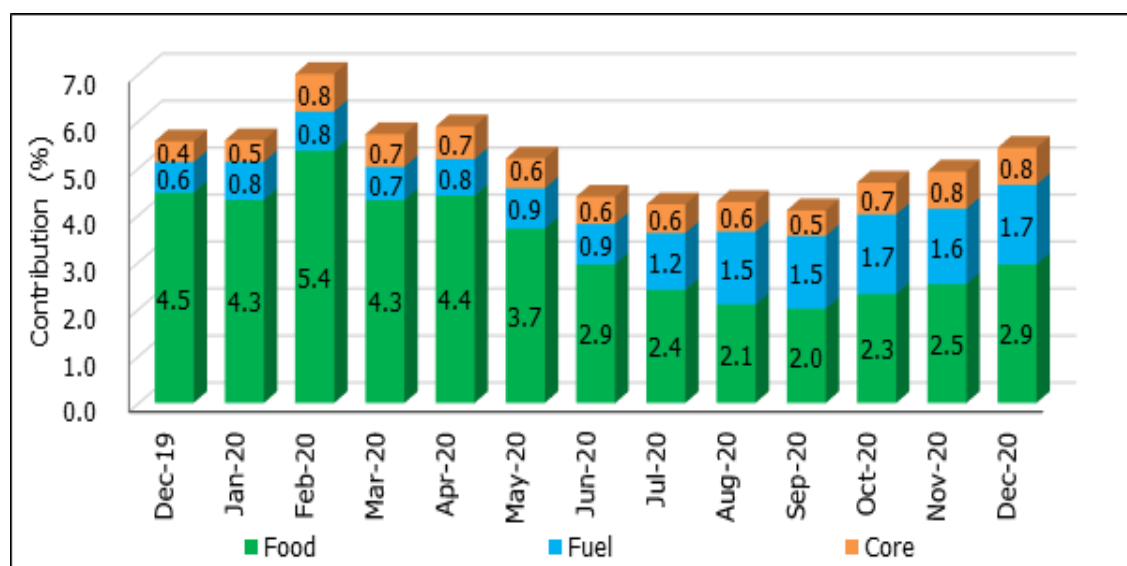

Source of Data: Kenya National Bureau of Statistics

77. Core inflation (Non-Food-Non-Fuel) contribution to inflation remain low at 0.8 percent in December 2020 compared to 0.4 percent in December 2019 reflecting muted demand pressures in the economy on account of prudent monetary policies. However, the contribution of fuel inflation to overall year-on-year inflation rose to 1.7 percent in December 2020 from 0.6 percent in December 2019 on account of increasing international fuel prices (**Figure 5**).

78. The major driver of the overall inflation has been food inflation, but its contribution to overall inflation has declined from 4.5 percent in December 2019 to 2.9 percent in December 2020 on account of a reduction in food prices.

Figure 5: Contribution to Overall Inflation, Percentage Points

Source of Data: Kenya National Bureau of Statistics

79. Kenya’s rate of inflation compares favorably with the rest of Sub-Saharan Africa countries. In December 2020, Kenya recorded a lower inflation rate than Burundi, Ghana, Nigeria, Zambia and Ethiopia (Figure 6).

Figure 6: Inflation Rates in selected African Countries (December 2020)

2.2.5 Kenya Shilling Exchange Rate

80. The foreign exchange market has largely remained stable but was partly affected by a significant strengthening of the US Dollar in the global markets and uncertainty with regard to the Covid-19 pandemic. In this regard, the Kenya Shilling to the dollar exchanged at Kshs 110.6 in December 2020 compared to Kshs. 101.5 in December 2019 (Figure 7).

Figure 7: Kenya Shilling Exchange Rate

Source of Data: Central Bank of Kenya

81. Like most Sub-Saharan Africa currencies, the Kenya Shilling has remained relatively stable weakening by only 9.0 percent against the US Dollar (**Figure 8**). This stability in the Kenya Shilling was supported by increased remittances and adequate foreign exchange reserves.

Figure 8: Performance of selected currencies against the US Dollar (December 2019 to December 2020)

2.2.6 Interest Rates

82. Short-term interest rates remained fairly low and stable. The Central Bank Rate was retained at 7.00 percent on November 26, 2020 same as in April 2020 to signal lower lending rates in order to support credit access by borrowers especially the Small and Medium Enterprises, distressed by COVID-19 pandemic. The interbank rate declined to 5.1 percent in December 2020 from 6.0 percent in December 2019 in line with the easing of the monetary policy and adequate liquidity in the money market (**Figure 9**).

83. The 91-day Treasury Bills rate was at 6.9 percent in December 2020 from 7.2 percent in December 2019. Over the same period, the 182-day Treasury Bills rate declined to 7.4 percent from 8.2 percent while the 364-day decreased to 8.3 percent from 9.8 percent.

2.2.7 Money and Credit

84. Growth in broad money supply, M3, improved to 14.2 percent in the year to November 2020 compared to a growth of 5.9 percent in the year to November 2019 (**Table 3**). The improved growth in M3 was attributed to an increase in the Net Domestic Assets particularly improvement in net credit flows to the government and the private sector.

85. The primary source of growth in M3 in the year to November 2020 was the Net Domestic Assets (NDA) of the banking system, which improved to register a growth of 20.8 percent from a growth of 3.5 percent over a similar period in 2019. This is largely due to an improvement in net credit flows to both the Government and the private sector. Net credit flows to the other public sector decreased during the review period.

86. Private sector credit grew by 8.1 percent in the 12 months to November 2020 compared to a growth of 7.3 percent in the year to November 2019. This was supported by recovery in demand with the improved economic activity following the easing of COVID-19 containment measures, and accommodative monetary policy. Strong growth in lending was observed in the following sectors: agriculture (19.3 percent), consumer durables (18.8 percent), transport and communication (17.5 percent), manufacturing (10.0 percent), and real estate (9.1 percent). The operationalization of the Credit Guarantee Scheme for the vulnerable Micro Small and Medium sized Enterprises (MSMEs), will de-

risk lending by commercial banks, and is critical to increasing credit to this sector.

87. Net Foreign Assets (NFA) of the banking system in the year to November 2020 contracted by 8.2 percent, compared to a growth of 15.0 percent in the year to November 2019. The contraction in growth of the NFA was mainly reflected in the decline of the foreign currency reserves by the Central Bank. The NFA of commercial banks improved during the review period as a result of an increase in the commercial banks' deposits with the non-resident banks.

2.2.8 Balance of Payments

88. The overall balance of payments position improved to a surplus of US\$ 1,217.2 million (1.2 percent of GDP) in the year to September 2020 from a deficit of US\$ 1,058 million (1.1 percent of GDP) in the year to September 2019 (**Table 4 and Figure 10**). This was mainly due to an improvement in the current account balance.

89. The current account deficit stood at \$ 4,921.0 million (5.0 percent of GDP) in September 2020 from US\$ 5,009.1 million (5.3 percent of GDP) in September 2019. The improvement in the current account balance was mainly due to the improvement in the merchandise account balance and the Net primary income balance.

90. The balance in the merchandise account improved by US\$ 1,340.1 million to a deficit of US\$ (8,947.5) million in the year to September 2020 on account of a decline in imports and a marginal increase in exports. In the year to September 2020, exports grew by 2.8 percent primarily driven by tea exports, on account of increased production and an increased demand for tea from the UK. On the other hand, imports declined by 7.3 percent in the year to September 2020, as a result of reduction in the volume of oil importation and decline in the value of imported manufactured goods, particularly iron, steel, machinery and transport equipment such as vehicles, and SGR related imports.

91. Net services declined by 72.8 percent in the year to September 2020 mainly due to a significant decline in transport services and travel receipts as a result of the uncertainty associated with the Covid-19 pandemic and the resultant containment measures. Cargo through put performed well during the review period and provided a buffer in terms of transport receipts.

92. The capital account balance registered a surplus of US\$ 157.8 million in the year to September 2020. However, this was a US\$ 48.9 million decline compared to the balance witnessed in September 2019. Net Financial Inflows declined to US\$ 3,012.0 million from US\$ 6,714.3 million in the year to September 2019 (**Table 4**). The financial inflows were mainly in the form of direct investments and other investments which stood at US\$ 482.4 million and US\$ 4420.4 million, respectively in September 2020. The Net Portfolio investments outflows stood at US\$ 1,189.5 million.

2.2.9 Foreign Exchange Reserves

93. The banking system's foreign exchange holdings remained strong at US\$ 12,585.0 million in September 2020 up from US\$ 13,083.3 million in September 2019. The official foreign exchange reserves held by the Central Bank was at US\$ 8,765.1 million (5.4 months of import cover) in September 2020 compared with US\$ 9,441.6 million (5.8 months of import cover) in September 2019 (**Figure 11**).

94. This fulfils the requirement to maintain reserves at minimum of 4.0 months of imports cover to provide adequate buffer against short term shocks in the foreign exchange market. Commercial banks holdings increased to US\$ 3,819.9 in September 2020 from US\$ 3,641.7 million in September 2019.

2.2.10 Nairobi Securities Exchange

95. Activity in the capital markets declined in December 2020 compared to December 2019, with equity share prices declining as shown by the NSE 20 Share Index. The decline reflects the volatility in the financial markets as a result of the uncertainty surrounding the covid-19 pandemic. The NSE 20 Share Index was at 1,868 points by end of December 2020 compared to 2,654 points by end December 2019. Consequently, market capitalization declined from Kshs 2,540 billion to Kshs 2,337 billion over the same period (Figure 12).

Figure 12: Performance of the Nairobi Securities Exchange

2.2.11 Fiscal Performance

96. Budget execution in the first half for the FY 2020/21 was hampered by revenue shortfalls and rising expenditure pressures. The shortfalls in revenues reflect the weak business environment and the impact of the tax reliefs implemented in April 2020 to support people and businesses from the

adverse effect of Covid-19 Pandemic. Revenues are expected to progressively improve in the second half of the fiscal year following the gradual reopening of the economy and the increased demand for imports as well as improved domestic sales. Revenue performance is also expected to get a boost from reversal of tax reliefs, introduced in April 2020, effective January 2021.

97. The Government has embarked on expenditure rationalization and prioritization to ensure that expenditures are on the most impactful programmes that yield the highest welfare benefits to Kenyans.

2.2.12 Revenue Performance

98. Revenue collection to December 2020 declined by 14.0 percent compared to a growth of 17.1 percent in December 2019. This decline is attributed to the difficult operating environment due to the Covid-19 pandemic which has been adversely affecting revenue performance from March 2020. The cumulative total revenue - inclusive of Ministerial Appropriation in Aid (AiA) amounted to Kshs 800.1 billion against a target of Kshs 907.7 billion, with shortfalls recorded in both ordinary revenues (Kshs 75.8 billion) and Ministerial A-I-A (Kshs 31.8 billion).

99. Ordinary revenue collection to December 2020 amounted to Kshs 726.4 billion which was a contraction of 15.3 percent compared to a growth of 18.8 percent over the same period in 2019. The contraction was due to a decline in growth of all broad categories of ordinary revenues except import duty which grew by 0.5 percent during the review period. Specifically; Income tax declined by 15.8 percent, Value Added Tax (VAT) declined by 15.3 percent and Excise taxes declined by 0.6 percent.

100. Ministerial A-I-A inclusive of the Railway Development Levy amounted to Kshs 73.6 billion against a target of Kshs 105.4 billion. Ministerial AIA revenue, recorded 1.6 percent growth for the period ending December 2020 compared to a growth of 0.2 percent over a similar period in 2019

2.2.13. Expenditure Performance

101. Total expenditure and net lending for the period ending December 2020 amounted to Kshs 1,191.0 billion which was below the projected amount by Kshs 67.9 billion. Recurrent spending amounted to Kshs 798.7 billion while development expenditures amounted to Kshs 262.8 billion. Transfer to County Governments amounted to Kshs. 129.5 billion of which the equitable share amounted to Kshs. 115.0 billion.

102. Recurrent spending was below the projected target by Kshs 44.3 billion mainly on account of lower than targeted expenditure on operation

and maintenance, attributed to scaled down operations of the National Government in first quarter of the FY 2020/21 due to Covid-19 Pandemic and lower than projected payments in compensation of employees, pension and foreign interest. Development expenditure was also below target by Kshs 6.8 billion on account of below target disbursement of foreign financed payments by Kshs 48.8 billion. Disbursement to domestically financed programmes was above target by Kshs 44.7 billion.

103. Fiscal operations of the Government by end of December 2020 resulted in an overall deficit, including grants of Kshs 362.6 billion against a projected deficit of Kshs 371.8 billion. This deficit was financed through net domestic borrowing of Kshs 345.4 billion and net foreign financing of Kshs 17.2 billion.

2.2.14 Fiscal Policy

104. Going forward into the medium term, the Government will continue with its expenditure prioritization policy with a view to achieving the transformative development agenda which is anchored on provision of core services, ensuring equity and minimizing costs through the elimination of duplication and inefficiencies, creation of employment opportunities and improving the general welfare of the people. This will curtail growth in public expenditures to ensure it attains its fiscal consolidation path over the medium term and it will ensure debt is maintained within sustainable levels. The fiscal deficit is expected to decline from 7.8 percent of GDP in FY 2019/20 to around 3.6 percent of GDP by FY 2024/25.

105. To achieve this target, the Government will continue to restrict growth in recurrent spending and double its effort in domestic resource mobilization. In the FY 2019/20, the Government is implementing a raft of tax policy measures through the Tax Amendment Law and the Finance Act, 2020. Revenue performance will be underpinned by the on-going reforms in tax policy and revenue administration boosted by economic recovery occasioned by the Economic Stimulus Programme and the planned Post Covid-19 Economic Recovery Strategy.

106. Further, Public Investment Management (PIM) Unit at the National Treasury continues to play a great role in enhancing efficiency in identification and implementation of priority social and investment projects. This takes into account the Government's efforts to increase efficiency, effectiveness, transparency and accountability of public spending. In particular, the implementation of PIM regulations under the PFM Act, 2012 will streamline the initiation, execution and delivery of public investment projects. It will also curtail runaway project costs, eliminate duplications and improve working synergy among implementation actors for timely delivery of development projects.
107. In this regard, expenditures as a share of GDP are projected to decline from 25.2 percent in the FY 2019/20 to 25.9 percent in the FY 2020/21 and further to 21.6 percent in the FY 2024/25. On the other hand, revenues as a share of GDP are projected at 17.0 percent in FY 2019/20, 16.4 percent in FY 2020/21 and 17.7 percent in FY 2024/25.
108. The Government continues to implement initiatives to boost revenue performance and enhance tax compliance. These revenue supporting initiatives will over the medium to long term help in revenue recovery and drive revenue performance. The initiatives include:
109. Reversal of tax cut measures put in place in April 2020 to cushion the economy from the impact of the COVID-19 pandemic. The reversal takes effect from January 2021;
110. Strengthening Audit function in the Domestic Taxes Department;
111. Enhanced Debt collection Programme that will leverage on the i-Tax debt module to reconcile and facilitate collection of debt;
112. Compliance level reviews with a focus on enforcement risk framework to support targeted enforcement;
113. Enhanced Scanning through strengthening staff capacity in the scanner management unit;
114. Aiding the resolution of tax disputes through the Alternative Dispute Resolution (ADR); and
115. Fast track conclusion cases before Tax Appeals Tribunal and Court Tax Appeals Tribunal & Court. Focus is also on moving some of these cases from Court to ADR.

116. Given the expenditure rationalization and the revenue recovery measures put in place, fiscal deficit inclusive of grants is projected to increase from Kshs 796.8 billion (equivalent to 7.8 percent of GDP) in the FY 2019/20 to Kshs 1,000.2 billion (equivalent to 9.0 percent of GDP) in the FY 2020/21 and decline to Kshs 622.1 billion (equivalent to 3.6 percent of GDP) in the FY 2024/25. To finance the fiscal deficit in the FY 2020/21, domestic borrowing is projected at Kshs 572.7 billion and foreign financing at Kshs 427.5 billion as reflected in Table 5. In the medium term, debt is projected to remain sustainable.

2.3 Economic Outlook

2.3.1 Global Growth Outlook

117. World economic growth is projected to rebound to 5.2 percent in 2021 from a contraction of 4.4 percent in 2020 mainly supported by a gradual strengthening in consumption and investment is also expected to firm up. Growth in the advanced economies is projected to improve to 3.9 percent in 2021 compared to a contraction of 5.8 percent in 2020 supported by improved growths in the major economies particularly the United States and the United Kingdom. Growth in the

Euro area is also projected to improve to 5.2 percent from a contraction of 8.3 percent in 2020.

118. The emerging markets and developing economies are also projected to improve to 6.0 percent in 2021 from a contraction of 3.3 percent in 2020. This recovery is well echoed in the forecasted growths of Emerging and Developing Asia and Europe, Latin America and the Caribbean, and Sub-Saharan Africa.

119. Consistent with forecast in the other regions, economic growth in the Sub-Saharan Africa region is expected to recover to 3.1 percent in 2021 as most of the economies in the region recover from the adverse effects of the Covid-19 Pandemic.

2.3.2 Domestic Growth Outlook.

120. The growth outlook for 2020 has been revised down from the initial projection of 2.6 percent in the 2020 Budget Review and Outlook Paper (BROP) following receipt of more recent indicators and taking into account the contraction of 5.7 percent in the second quarter and the World Economic Outlook figures released by the IMF. In this respect, economic growth for 2020 is now estimated at 0.6 percent in 2020 and recover to 6.4 percent in 2021 due to in part, the lower base effect in 2020.

121. Looking ahead, economic growth is projected to slow down to 5.5 percent in 2022 (due to in part the uncertainty associated with the 2022 general elections) and recover to 6.1 percent by 2024. In terms of fiscal years, economic growth is projected to grow by 3.5 percent in FY 2020/21 and further to 6.2 percent over the medium term.

122. This growth outlook for the calendar year 2020 and the FY 2020/21 and the medium term, will be supported by the stable macroeconomic environment, ongoing investments in strategic priorities of the Government under the “Big Four” Agenda, the ongoing public investments in infrastructure projects, the Economic Stimulus Program being implemented and the planned Post Covid-19 Economic Recovery Strategy, turn around in trade as economies recover from Covid-19

123. Pandemic and expected favorable weather that will support agricultural output. These factors will push up consumer demand and increase both public and private sector investment reinforcing the projected growth. The economic growth projections over the medium term are aligned to those of the Third Medium Term Plan (2018-2022) which is implementing Vision 2030

2.3.3 County Growth Outlook

124. Kitui County's economy slightly shrunk in the 2019/2020 FY as compared to 2018/2019 FY. This has been due to the Covid-19 pandemic that has led to closure of small and medium enterprises due to shortage of supply and high cost of doing business resulting from restriction measures and or low incomes realized by the surviving businesses. The local revenue under the period decreased by 7.97% in relation to the previous 2018/2019 FY.
125. In the National Economic Outlook, there is an anticipated slow economic growth in 2022 partially due to the oncoming general elections. This in return is expected to trickle down to the County level. However, the County has measures in place to cushion its economic status and ensure sustainable growth, however sluggish, especially in the election year. The focus of the policies in the CFSP is to continue providing an enabling environment for economic recovery to safeguard livelihoods, jobs, businesses and industrial recovery. In this respect, the County Government will strengthen implementation of programmes and measures that ensure a more inclusive growth, foster macroeconomic stability, and avail liquidity to the private sector including initiating innovative products to boost credit to Micro, Small and Medium Enterprises (MSMEs) as herein discussed.
126. Training Youths on Entrepreneurship through Kitui Youth Skills and Enterprise Centre (KIYOSEC) on garment making, vocational skills and technical skills e.g. electrical, plumbing, mechanical (Qualified artisans) etc., Capacity building for the Boda boda operators by equipping them with necessary skills, safety measures and formation of co-operatives, Support Car washing businesses, Attachment, internship and apprenticeship program (on-job training), Formation of groups (co-operatives) to drive business processes and assisting them acquire various equipment for value addition, Upscaling youth business skills; (upgrading business skills and startup kit for small scale businesses – Access to credit) and Establishment of centers of excellence in Youth Polytechnics; (modern technical workshops) will go a long way to address the socio-economic issues within the County.

127. In the 2019/2020 FY, the county purchased a stone crusher and leased land with an aim of creating more wealth and maximizing the available resources in Kitui Rural Sub-County. The crusher will act as an economic booster with its supply of ballast to Thwake dam and other infrastructure within the county. In addition, the crusher will create job opportunities to the youths and increase overall County revenue. To date, the crusher has been able to produce around 6,000 tons of ballast with 5 employees working as operators, electricians and casuals. Around 1000 community members are expected to benefit from the plant directly in form of sale of stones/boulders to the crusher. Other benefits will accrue to hotels and estate managers (house occupancy).
128. With the aim of wealth creation and Youth empowerment, the County established a Textile center (garment factory) at Syongila in Kitui Township ward. The Kitui County Textile Centre (KICOTEC) was awarded a tender by the National Government to produce uniforms to all chiefs across the country. The factory has continuously produced school uniforms to secondary and primary schools, special group's uniforms. The Textile Centre was tasked to manufacture masks and protective gears in aid of curbing the Covid-19 pandemic. Due to its operational, the factory has created over 700 job opportunities to youths of which 80% are women and additional revenue to the County. In 2019/20 financial year, KICOTEC declared a profit-before tax of Ksh 8.4m which was reinvested.
129. In 2019/2020 FY, the county empowered the farmers in bee keeping and honey production which involved training of the 36 farmer groups, purchase and distribution of 490 cab hives(modern hives) and accessories to the groups. This ensured the modern methods of bee keeping with increase the honey production and quality hence value chain addition on the honey. The groups harvested 6 tons of honey in 2020 and have so far harvested 1.8 tons in January 2021. The county government in 2021/2022 FY intends to provide 50 groups with 1,000 modern hives.
130. Within the same period 2019/2020 FY, the county promoted the high value horticultural crops programmes in the Myanda irrigation project which aimed to increase the food security. The projects involved supply of assorted seeds, fungicides and the insecticides to the selected areas benefiting 22,409 farmers and generated produce worth Kshs. 687,362,750. In 2020/2021 FY, 8,057 farmers were

supported with 2,751 Kg of horticultural seeds (mostly tomatoes) worth Kshs 659, 680. Distribution to cluster groups is ongoing.

131. In addressing the County Government agenda of food security, 40 farm tractors were procured to assist farmers in land preparation and within the same period, operationalization of farm tractor ploughing services was conducted across the County with an aim of improving the food productivity covering 14,549 acres benefiting 10,982 farmers for the entire period of 2017/18-2020/21FYs. The long and short rains of year (2020/21) was below normal hence affected the productivity of green grams and other crops.

132. In the 2019/2020 FY, to provide the county residence with clean water for domestic use and agriculture, the County constructed/ desilted 6 surface water sources (earth dams/ pan and rock catchments), 16 water pipelines extensions and drilling and equipping of 7 boreholes. These promoted the production of food and development of the livestock across the county. The boreholes were installed with solar powered pumps which reduces the cost of operation.

133. In the 2019/20 FY, the county government provided subsidies to water supply providers (WSPs) to KITWASCO & KIMWASCO worth Kshs. 137,651,525 who supply water to Kitui town and Mwingi town respectively. These promoted the provision of clean water to residence of the two towns with 100,000 people benefiting.

134. For any economy to grow, road infrastructure is a key enabler hence the county graded, constructed and repaired roads across the county. The road project included 2,000KM grading/bush clearing, 384.10KM road maintenance and 1391M drifts constructed. As a result, there smooth movement of persons and goods across the county.

2.3.4 Risks to the Economic Outlook

135. Risks from the global economies relate to persistence of the Covid-19 pandemic and required lockdowns, voluntary social distancing and its effect on consumption, the ability of laid off workers securing employment in other sectors, rising operating cost to make work places more hygienic and safe, reconfiguration of disrupted global supply chains, extent of cross-border spill overs occasioned by weaker external demand and funding shortfalls.

136. On the domestic front, risks will emanate from weaker external demand, reduced tourist arrivals and containment measures due the Covid-19 pandemic. In addition, the economy will continue to be exposed to risks arising from public expenditure pressures, particularly wage related recurrent expenditures and the erratic weather related shocks that could have negative impact on energy generation and agricultural output leading to higher inflation that could slow down growth.

137. The Government is continually monitoring these risks and taking appropriate monetary and fiscal policy measures to preserve macroeconomic stability and strengthen resilience in the economy. To cushion the country against the downsides of the risks, the Government is implementing an Economic Stimulus Package to protect lives and livelihoods. Implementation of the “Big Four” Agenda will unlock better growth, and positively impact on the lives of people through jobs creation and poverty reduction. The Government is also planning a Post Covid-19 Economic Recovery Strategy to return the economy on a stable growth path. Additionally, the diversified nature of our economy continues to offer resilience to any global challenges.

3 BUDGET FOR FY 2021-22 AND THE MEDIUM TERM

138. The County government is committed to fiscal discipline in order to stimulate overall economic growth and ensure productive sector growth. In this regard, revenue administration reforms and expenditure management will be implemented to upsurge efficiency, diminish wastage and mobilize revenues to create fiscal space for funding development programmes within the budget.

3.1 FY 2021/22 Budget Framework

139. In the FY 2021/22 prioritization of resource allocation will be based on the County Integrated Development Plan (CIDP), Departmental priorities, programmes and development policies of the County Government. The 2021/22 FY budget will institute reforms targeted at consolidating gains, achieving efficiency and productivity of government spending. The CIDP takes into account the development Agenda of the County by including programmes for the County residents with high impact on their welfare.

3.2 Revenue Projections

140. The County government projects to receive a transfer of about Kshs.10.9 billion from the National Government for the FY 2021/22 constituting an equitable share allocation of Kshs. 10.39 billion and conditional grants of Kshs 0.505 billion

respectively. The allocations are indicative as the actual allocation will be provided in the County Allocation of Revenue Act (CARA), 2020.

141. For the 2021/22 FY, the County projects Kshs. 0.60 billion revenues from its own sources. The projected total revenue for the FY 2021/22 is therefore Kshs 11.5 Billion, both Kshs. 0.60 billion as County's own revenues and Kshs. 10.39 billion as transfers from the National Government inclusive of Kshs. 0.505 billion as grants.

142. The County Executive will present to the County Assembly, more detailed structural measures to boost revenue generation through the Finance Bill, 2020, for consideration and enactment as required by the PFM Act, 2012.

3.3 Expenditure Projections

143. To redirect expenditure to the priority programmes detailed in chapter two, County departments will review their budgets with an aim of removing low-priority expenditures and one-off expenditures from previous years in order to realize savings that can be realigned/reallocated to high priority programmes and ensure completion of the ongoing projects. The performance of earlier funded projects/programmes will also be reviewed with a view to improving the implementation and absorption capacity of development projects. This will also ensure that projects are well planned and executed as planned.

3.4 Recurrent Expenditure Projections

144. Total recurrent expenditure budget in the FY 2021/22 is estimated to be Kshs.6.4 billion as compared to Kshs.7.44 billion in FY 2020/21 printed budget estimates. The wage bill is projected at Kshs. 4.59 Billion in the FY 2021/22 compared to Kshs. 4.4 Billion in 2020/21 FY thereby increasing by 5.0%. The projected wage bill is 39.91 percent of total revenues.

145. The PFM (County Governments) Regulations, 2015, requires that the County Governments maintain employee compensation levels at not more than 35 percent of their total revenue. In the medium term, the County government is committed to ensuring compliance with this fiscal responsibility principle.

146. The Operations and Maintenance expenditures will be lower in the medium term due to removal of one-off expenditures such as office infrastructure and equipment from the recurrent budget coupled with other expenditure rationalization measures. The estimated amount in the FY 2021/22 is Kshs. 1.85 billion down from the printed estimate of Kshs. 3.06 billion for the FY 2020/21.

3.5 Development Expenditure Projections

147. In the FY 2021/22, the overall development expenditure is expected to be Kshs. 4.28 billion. This accounts for 37.2 percent of the overall budget, which is in line with the fiscal responsibility requirement of allocating at least 30 percent of the budget to development expenditure.

3.6 Overall Deficit and Financing

148. To avoid deficits that have no clear plan on how they will be funded, the County Government has allocated resources for spending that are corresponding to the revenues expected in the FY 2021/22. In that FY therefore, the County budget shall be financed through transfer from the National Government and local revenue collected from fees, charges, rates, among others as allowed by the governing legal framework. The FY 2021/22 fiscal framework is therefore fully financed.

3.7 Risks to the 2021/22 County budget framework

149. The risks to the fiscal framework for the FY 2021/22 includes:
- a. Over reliance on national government transfers is a risk that undermines the County's fiscal autonomy. Coupled with the unpredictability on account of the delays in release of the resources, this poses a great risk to proper implementation of the County's budget. This can be curbed by measures to increase local revenue collection by the County Government. The monies mobilized can be used to cushion the County in the times that the National Government delays in exchequer releases.
 - b. The County's frequent failures to meet the revenue target due to unforeseen factors is another risk to the fiscal framework for the FY 2021/22. This remains a major challenge as it can generate pending bills and cause general cash flow problems or even cause undue demand for borrowing. To counter this, the County will put in structural reforms aimed at sealing loopholes in revenue realization, revenue enhancement measures while ensuring there are efficient and cost effective methods of collecting the revenues.
 - c. Another risk is the County's high wage bill that stands at 39.91 %. Even though recruitment of new staff in the county has been put on hold, there have been demands for promotions and strikes by especially health workers on pay

increments. Furthermore, the County is waiting for proposed recommendations under the CARPs programme and the SRC's job evaluation exercise. The lack of clear guidelines for clarity, harmony of operations and delay by the National Government in finalizing the CARPS exercise has been a drawback. It is expected that once the exercise is completed, the National Treasury will allocate enough funds for implementation of the recommendations, which may include staff compensation in the event of rationalization. However, in a bid to lower the wage bill, the County Government has been laying off Casual workers who have been largely contributing to the ballooned wage bill. Further, the County anticipates the retirement of a big number of workers who have attained the legal retirement age. This will automatically lower the wage bill, considering the fact that the positions will be revised to ensure retainment of only crucial/necessary positions.

- d. Duplication of functions in some areas that are still contentious between the National and County Governments that risk generating intergovernmental conflicts, wasteful spending and financing gaps that could adversely affect implementation of the County's fiscal framework is another risk that needs to be mitigated through dialogue and consensus building.
- e. Delays in passing of crucial bills by the County Assembly could also affect budget implementation. This can be mitigated by ensuring political goodwill through harmonious working relationship between the County Assembly and the Executive. This will lead to timely approval of crucial policy and budget documents without much conflict.

3.8 Fiscal Structural Reforms

3.8.1 Revenue mobilization:

150. The County government will put in place measures to meet its revenue target as this will enable the County to implement its development programmes. The County has so far implemented various reforms aimed at sealing revenue leakage loopholes. This will be facilitated through completion of the automation of systems and revenue collection. By so doing, all payments in the County will be made electronically and in return administrative costs are expected to significantly reduce. Also, this will minimize leakages and expand access to payment points, which will improve on accountability.

151. The County Government will adopt other key strategies amongst them; mobilization of additional revenue by strengthening enforcement and expansion of the revenue base. This will continue to remain the key focus in the next FY. The County will focus on land and property tax as the most appropriate and equitable source of revenue to finance development and provision of essential services. To this effect, the County will finalize and implement the Valuation Roll completed recently in order to widen the tax base. These, and other measures laid down for implementation are contained in a Revenue Enhancement plan by County Treasury.

3.8.2 Expenditure Management

152. The County will continue to use Integrated Financial Management System (IFMIS) as the system for processing payments. On implementation of projects, the County will continue to undertake capacity building initiatives to properly support other Departments. Consultations with the County Budget and Economic Forum (CBEF) will be deepened on all matters of planning, budgeting and financial management. Audit Committees have so far been formed and fully operational. Such consultations also ensure that there is transparency, accountability, and adherence to the PFM Act on budget making process.

153. The County Government will use bottom up approach on project identification. Projects will be identified at the ward level based on community needs in each ward. This will be approved by the County Assembly and implemented by the County Executive in compliance with the law. The County services are expected to be brought closer to residents which will go a long way in deepening devolution.

154. The County Government will continue with civic education programmes to enhance awareness and facilitate proper flow of information. Increased cooperation between the County Government and the County Assembly will ensure there is efficient running of County government thereby improving service delivery.

155. In order to contain recurrent and non-essential spending, the County will focus on the following areas of intervention:

- a) Foreign and domestic travel will be limited to essential travels
- b) Limiting training to the need basis and essential/critical.

- c) Issuance of circulars and strict enforcement of cost reduction measures to all County Departments.
- d) Implement a strict commitment control system to reduce the stock of pending bills.

3.9 Guiding Principles in Resource Allocation

149. The PFM Act, 2012 and the PFM (County Regulations), 2015 sets out fiscal responsibility principles that guide the Medium Term Expenditure Framework (MTEF) for the County. The guiding principles that are considered in the allocation of the available resources include:

150. The requirement that the County public debt shall never exceed twenty (20) percent of the County government's total revenue at any one time. The county will not be incurring any debt; The County Government wages shall be contained at thirty-five (35) percent of the County government's total revenue in the medium term; the approved expenditures of a County assembly will be as per senate's recommendations, the County government actual expenditure on development shall be at least thirty percent.

3.10 County's Adherence to the Fiscal Responsibility Principles.

151. The proposed MTEF adheres to the fiscal responsibility principles outlined above as follows. The development expenditures have been projected at 37.2 percent of the County budget against an obligatory minimum of 30 percent. (See table 2) The wage bill is estimated at 39.91 percent of total revenues for FY 2021/22. The principle that wage bill shall not exceed 35 percent of the County government's total revenue is not met; the expenditure estimates for the County Assembly are at 7.44 percent of the total County revenues. Fiscal risks will be managed prudently to ensure a reasonable degree of predictability with respect to the level of tax rates, charges and tax bases. The County does not intend to borrow in the FY 2021/22 and has therefore adhered to the principle of debt not exceeding 20 percent of the County government's total revenue.

3.11 Resource Sharing Guidelines

152. Allocation of Departmental ceilings over the medium has been informed by the following guidelines. In the recurrent expenditure category, non-discretionary expenditures take first charge. This includes payment of Salaries and wages projected at 39.91 percent of the expected total revenue receipts. Other recurrent expenditures that include operations and maintenance account for 22.9 Percent of the projected total revenue. Development expenditure takes 37.2 percent of the total revenue available. Development expenditures have been

shared out on the basis of the CIDP priorities and strategic interventions identified in various forums. Also included in the criteria used for apportioning the capital budget is on-going projects and intervention on investment projects in priority areas that support social development, economic growth and transformation of the County. The projected Departmental expenditure ceilings are summarized in the table 7 below.
